MISSION RANCH SITE UNAVAILABLE

Council "Unfriendly" Toward Cutting of Lower Eighth Avenue

The city council "smelled a rat" at Wednesday afternoon's meeting when it examined names of signers of a petition, presumably circulated by Percy Parkes, requesting the opening of lower Eighth avenue between San Antonio street and Scenic Drive.

It was immediately pointed out that the names on the petition failed to include property owners of the immediate area, but did include signatures of non-residents, non-property owners, non-citizens, non-taxpayers, and many who probably haven't been near San Antonio and Scenic within the last twelvemonth.

Small wonder then that the council appeared "unfriendly" toward the petition which contained a mere 76 names, only 37 of them names of Carmel taxpayers. The petition even included the name of Pon Lung Chung, who, however, is a respected member of the community and long a volunteer servant of the city as a member of the fire department.

Miss Clara Kellogg, street commissioner, declared there were no funds available for the grading, surfacing and oiling of lower Eighth street, a portion which Carmel has willingly left undeveloped these many years.

Scenic drive has no outlet between Ocean avenue and Thirteenth, has houses only on one side of the street, and is used only by traffic immediately to those houses or to view the scenery of beach and bay. The absence of intersections contributes to the safety of this traffic.

Mayor Herbert Heron jocularly

Horsemen to Attend Trials for Hunters

Much activity for the horselovers of the peninsula this Friday and Saturday will center on the hunter trials. Tomorrow the trials will be on the Seventeen-Mile Drive course of 18 jumps. The day begins with a hunt breakfast at Douglas School when a group, composed of the officers at the Monterey Presidio and their wives, will drive over in a tally-ho complete with horn. Following the trials Miss Geraldine Flint will be hostess at tea in her Pebble Beach home, Los Pedrales, for the entrants and those present at the trials. In the evening there will be a hunt dinner at Del Monte Hotel. The second day, Sunday, the scene will shift to the Pogonip Polo Club in Santa Cruz when Mrs. Deming Wheeler will be hostess at a luncheon for those attending. Trophies have been donated by Mrs. Deming Wheeler, Mrs. Robert Laws and Mrs. Robert E. Gross. The championship trophy will be presented by Mrs. Muriel Vanderbilt Phelps. Among those expected here for the event are Mr. and Mrs. Richard Barthelmess of Hollywood, Mr. and Mrs. Russell Havenstrite, Los Angeles; Mr. and Mrs. Matthew Jenkins, Merced; Dr. and Mrs. Hartley Dewey, Yosemite; Dr. Maurice Hopkins, Sacramento; Mrs. Thomas Joyce, Jr., Beverley Hills, and Miss Elizabeth Henry, Stockton.

hinted that the signers of the petition be asked to contribute to the cost of the street improvement, and Miss Kellogg put this into practical form by suggesting they recommend a method of financing the job.

Miss Hazel Watrous remarked that there was "so little connection between signers and the street."

The steep grade of Eighth was regarded as a possible hazard. The petition was tabled.

Hatton Fields Sewer Job Goes Ahead Fast

Starting up Hatton road in Hatton Fields north of Ocean avenue, the ditch-digging equipment made great progress this week on sewers in that area. Pipe was laid as the trencher advanced, but little impeded by the underlying sandstone and shale. Stolte and company has the sewage disposal plant job well under way, but has employed only a few men so far. This job, in accordance with Stolte practice, is all-union.

Carmel's "Bundling" Play Given Cold Shoulder By Pacific Grove Moralists

Carmel is a crack-pot Bohemian town again—in the eyes of officials in Pacific Grove who decided this week not to sponsor the Carmel Players' "bundling" play, "Pursuit of Happiness", in a presentation in that fair city. Perhaps the spicy lines and frivolous scenes were too much for Pacific Grove officials who raised their hands in horror as broad-minded Carmelites tittered at admittedly broad suggestions, which, however, were nothing more than suggestions.

"Pursuit of Happiness" was to have been given this week-end at Pacific Grove high school under auspices of the Monterey Junior Chamber of Commerce. The nature of the play, however, was not a happy one for a Pacific Grove showing, it was finally decided. Another stage is being sought for the play by Cliff Jones of the Junior chamber, and a bid for "Ceiling Zero", has also been entered by Jones for presentation in Monterey or Pacific Grove.

"Ceiling Zero" is scheduled for Sunset auditorium April 7 and 8.

Carmel Players this week swung into the period of their most intensive activity to date, with more going on in and around the Green Room than at any other time during the past year and a half. The most successful membership meeting to date was held last Sunday evening in the Green Room.

Meanwhile Director Charles McCarthy conducted readings to select a cast of 22, 19 of whom are men, for "Ceiling Zero", a gripping dramatic play of commercial aviation, written by Frank Wead. He has discovered some very promising new talent, notably Dick Merrill, John Wachtel

Quarantine Placed on Dogs

Strict State quarantine of dogs in the entire peninsula area from Carmel river north to Marina was imposed yesterday, according to Dr. Dwight M. Bissell, county health officer.

Since March 1 there have been 13 cases of rabies and in the past nine months 24 persons have been under treatment.

One positive case of rabies was reported on Wednesday from Pebble Beach, Earle Duclous, health inspector at Monterey, said yesterday.

All dogs must be kept on the premises and leashed, caged, or in a pad-dock, to prevent them escaping by way of low fences or open doors. Any animals so escaping, however, may be redeemed by permit from Duclous.

(Continued on page 13)

Walker's Representatives Say Property Not Open for School

The Mission Ranch Club property, owned by Willis J. Walker and mortgaged to the Anglo-Californian Bank, is "unavailable" for a Sunset high school site, the trustees were told by Corum Jackson, Carmel Realty company representative, as Walker's agent.

The site had been strongly urged by Charles K. Van Riper, one of the leading spirits in last summer's secession from the Monterey Union high school district.

Two other sites are under consideration by the Sunset board of trustees and their advisory committee,

Committee on City Hall "Hangs Fire"

Mayor Herbert Heron indicated at Wednesday's council meeting that the committee searching for details and a plan for a city hall was virtually stalled. Threat of legal action against any plan to alter Sixth avenue to permit a city hall at the edge of the Plaza, Heron said, automatically halted work on this proposition.

now at work on details regarding the respective merits of the Hatton Fields site and the Paradise Park site.

Jackson told the board at an adjourned special meeting at Sunset school library Tuesday afternoon: "The Mission Ranch property is not available." He stated that he spoke as Walker's representative, and said "I do not feel I can state a price."

Mrs. Doris Watson, Sunset trustee who remained on the board after the resignation of Frank N. Shea and Victor Graham over the popular refusal to accept their decision in favor of Paradise Park, declared: "I would not condemn it (Mission Ranch property) unless it was the only piece of property possible for a high school site."

On Monday afternoon the board held a special meeting and rescinded the resolution of Dec. 31, 1938, to purchase Paradise Park. This resolution was passed by the old board before the resignation of Shea and Graham.

Hugh Comstock as chairman explained that the resolution was withdrawn in order to place the two sites on an equal footing before the board.

Sunset bonds, to the extent of \$165,000, as voted several months ago, were sold this week and brought a \$250 premium.

They will draw interest at a rate of 2 3/4 per cent after the first three years, during which the rate will be 5 per cent, and the average over the 20 years will be 2.65 per cent. No explanation of this method was given. The board had figured on an interest rate of between 3 and 4 per cent and felt entirely satisfied with the favorable bid of Schwabacher & Company.

Pistol Club Shoots Match This Evening

The first shoot of the year will be held by the Carmel Pistol Club tonight at 7:30 in the club's indoor range.

A large turnout is expected to shoot for the fine medals, which have been donated by one of the club members.

An entry fee of 25 cents will be charged for each person shooting. Paul Funchess is the range officer for the evening. Targets will be fired slow fire.

Resident of Valley, Hull McClaughry Dies

For the last ten years a resident of Carmel Valley, Hull McClaughry, retired San Francisco and Sacramento lawyer, died last Saturday. He leaves his wife, Mrs. Louise Hart McClaughry. He had been ill for some time.

MRS. WOODS SPEAKER

Mrs. Gertrude Woods, of the arts and sciences division at the Exposition, will speak at La Playa at 3:30 this afternoon on "Behind the Scenes at the World's Fair."

FROM A WINDOW IN VAGABOND'S HOUSE . . . By Don Blanding

Spring fever certainly has a strange hold on me these days. I'm supposed to be producing a book full of verses and illustrations, but production is at a standstill with the creative energies doing a sit-down strike with sabotage going on in my mind . . . such as it is. I get myself by the scruff of the neck and haul myself to the drawing board or typewriter with grim determination to get something done this day . . . with what results! My thoughts go sneaking out the windows to roads that lead anywhere and everywhere. I see the desert beginning to put on its transient dotted swiss and sprigged dimity spring dress and I long to see that bleak weatherbeaten jade going

debutante on the party. I know that soon the roadsides along the Redwood Highway will be bursting out with azaleas and wild iris and I want to see them. April means the beginnings of the flowering-tree season in Hawaii and before very long the golden shower trees will be dripping with yellow tassels and the poincianas will be bursting into flame like flowery conflagrations against backgrounds of purple jacaranda or magenta bougainvillees. Only a little later the white ginger will be drenching the air with their unforgettable pagan perfume. I want to board the Clipper and go.

Through the open window comes the honey-sweet fragrance of Carmel's acacia, disturbing and alluring. Any pictures I might make with words or pen lines are so dull in comparison with what I see outside my windows that I am discouraged. I'll bet I walked up to the Post Office a dozen times today for imaginary mail . . . I know as well as the next one how many times the mail is put

BODY and FENDER REPAIRING

WILD'S AUTO SERVICENTER
Opposite Fire House

Even a Child
can figure out that
HOME is
NOT the place
for laundering
7th GRADE ARITHMETIC
Will keep you from being MISLED

WANTED—A Housewife to work seven hours a week; salary, none. . .

Would you take this job? Of course you wouldn't, but that's what you do when you do the family washing at home! You gain nothing for your efforts; figure the costs of home-washing every week. Don't overlook such items as interest on investment, soaps, water softeners, starch, blueing, electricity, gas, repairs and depreciation on equipment . . . your total home washing costs will prove that compared with laundry charges, the Grove Laundry saves you money . . . and don't forget—All a domestic wash machine delivers is a damp wash bundle, and we sell that service for 4c a pound.

Home Is NO Place for the Family Washing

DAMP WASH 4 cts. lb.
12½ lbs. for 50c. Comes back to you clean and sweet, ready for ironing. You don't have to hang it out to dry.

DRY WASH 7 cts. lb.
Plus 1 cent for each handkerchief. Minimum bundle 70c. All wearing apparel is washed and returned dry—ready for ironing. All plain flat work—in sheets, slips, towels, table linen—is ironed and ready for use.

De LUXE FINISH
The cost of this service is based on each individual piece. Buttons sewed on and minor repairs free. There is nothing for you to do but put the articles away.

THRIFTY SERVICE 6 cts. lb.
Plus 1 cent for each handkerchief. Minimum bundle 60c. All wearing apparel returned damp, ready to iron. All plain flat work in sheets, slips, towels, table linen—is ironed. Must have 12 pieces of wearing apparel.

SEMI-FINISH 10 cts. lb.
Minimum bundle \$1. Everything ironed flat on our Asher Ironer. An economical service for the woman who likes to touch up the garments at home.

LINEN SUPPLY
For the merchant, barber, beauty parlor and professional man.

We are members of the American Institute of Laundering, and have been for nearly a decade. We conduct our business in accordance with the high standards of this association.

Death Takes Director But Play Goes On

"The play must go on," old tradition of the theater, was re-enacted by the players in "Moor Born" on last Sunday night, when, in spite of the sudden and unexpected death of their director, Argentine-born Mario Ramirez, they went on with their play, itself of tragic nature.

Ramirez, who had lived for a short time here as the guest of Noel Sullivan at the Hollow Hills Farm in Carmel Valley, had won a great many friends during his brief stay, and all who knew him admired him for his modest character and sensitive nature.

Coming to this country 12 years ago from his native Buenos Aires, Ramirez became an American citizen. A trained architect, he worked on sets and in production in Hollywood and at the request of Dan Totheroh, author of "Moor Born", came here to direct the play. A brief illness, followed by a minor operation Sunday morning contributed to his death by heart failure.

Services were held at the Sullivan home on Tuesday morning and later at Carmel Mission, followed by entombment at the Catholic cemetery in Monterey.

SUNSET MENUS

Monday—cream of asparagus soup, blushing pear salad, spaghetti and cheese, carrots, ice cream.

Tuesday—vegetable soup, perfection salad, hot dogs, spinach, gingerbread.

Wednesday—cream of carrot soup, pineapple salad, cheese souffle, peas, ice cream.

Thursday—A. B. C. soup, vegetable salad, candied sweet potatoes, artichokes, fruit cup.

Friday—cream of tomato soup, peach salad, creamed tuna, corn, ice cream.

up, but it's an excuse. A flimsy excuse, but good enough to alibi my playing hooky from work.

Alf, the little black dog that adopted me, is no help. Usually he curls up contentedly by my feet and snores peacefully but now he, too, is full of strange longings and unrests. He prowls uneasily around the room and gives me long let's-take-a-walk looks against which I have no resistance.

If Mother were living I know she'd be dosing me with sulphur and molasses. I'd take some on my own responsibility if I remembered the right combination. I remember the first time that I experienced sulphur and molasses. A big glass of it was prepared for family use. Just on general principles I rebelled because it was loathsome looking stuff and I figured that anything that was "for my own good" was repulsive. But I rather liked it. The next morning when Mother got out the glass to give me my second dose of the stuff she found the glass empty. I had cleaned up my quota for spring in one gulping. My brothers watched with a certain excited anticipation to see me blow up or burst out with some interesting rash but it didn't seem to harm me . . . and whether it did me any good is still a moot question.

I don't know which is worse . . . spring fever or falling in love. The symptoms are similar. They both make little chenille caterpillars crawl in my veins . . . something like growing pains. A combination of delicious lethargy and sudden meaningless outbursts of undirected energy. I know it's spring fever I have because I'm not in love at present . . . I don't believe I am. But, one never can tell, can one?

Dare to be faithful to God and man.—Mary Baker Eddy.

SUNSET DISTRICT BONDS

WE own and offer, subject to prior sale or change in price \$165,000 Sunset School District, Monterey County, 5% and 2¼% bonds. Maturities April 1, 1940 to 1959 inclusive. Kite Day Brings Thrills To Hearts of Carmel Kids

Kites soared high in the air over Hatton Fields last Saturday afternoon. From 1 o'clock till nearly two, children came running to Sunset school, their precious handiwork clutched in anxious hands. Into three large trucks they piled and excitement ruled as king. Then the Red Cross ambulance wheeled out into San Carlos street, followed by the laden trucks and a long queue of cars, also full of excited children, and not-so-calm parents.

The procession, fully six blocks long, moved down Ocean avenue to Camino Real, drew to a halt in front of the home of the Reverend Willis G. White, founder of Carmel's Kite Day, and then proceeded along Santa Lucia to Hatton Fields.

Out tumbled the children and up went the kites. Some didn't go up and then there was anxiety and near tears. Mothers and fathers worked as hard as their children and soon the ground was a maze of strings and the air a fluttering of strange shapes, beautiful colors, and the good utilitarian kites that were meant to fly high and nothing else.

The sun, which had been hiding behind fog all day, suddenly decided it was time to make an appearance and beamed on Carmel children and their parents. Parents there were in plenty, running and shouting and laughing as much as the children, and those who didn't have a young contestant to proudly watch turned out anyway, just for the fun.

Finally the judges, who had been hurrying about, in and out and over strings and bumped into by running entrants, made their decisions and the kites came down. Round the central enclosure gathered young and old to see the lucky winners and their kites.

Following the prize giving there was ice cream and then away home. By 5 o'clock the field was deserted. Another kite festival had come and gone with joy and merriment a-plenty and a small spattering of tears, tears caused by accidents or disappointments so huge to children, without which no such contest is complete. But as the trucks and cars sped away, all sorrows were forgotten. "Next year" was the motto in minds both big and small.

The following are the official winners:

Best kite—Kindergarten-2nd grade (1) Henry Clay, flashlight; (2) Carol Jane Hill, paint book; (3) Elton Clark, carpenter's rule; (4) Carol Ann Burrows, model boat. 3rd-5th grades (1) Martha Moller; (2) Victor Harbor; (3) Dan Bell; (4) Nancy Smith. 6th-8th (1) Richard Cota; (2) George Moller; (3) Ruth Smith; (4) Sonja Koehler.

Prettiest Kite—(1) Mary Brown; (2) Carolyn Cory; (3) Nancy Street; (4) Laura Lee Koepf.

Highest flying kite—(1) Baird Bardarson; (2) Anita Machado; (3) Jack Mayes; (4) Douglas Calley.

Oddest kite—(1) Hans Sappok; (2) Gene Van Der Voert; (3) Vincent Torres; (4) Gordy Miyamoto.

Marin Joins Fight Against Billboards

Marin County, which recently banished its unsightly real estate signs in a move to make its famous landscape even more beautiful, is continuing its policy of roadside protection through support of Senator Tickle's anti-billboard legislation.

This proposed measure, Senate Bill 1011, has received the official endorsement of the following Marin county organizations: Marin Planning and Conservation League, Belvedere Improvement Club, Marin Art Association, Outdoor Art Club, Marin Garden Club, San Rafael Improvement Club, Tamalpais Center Woman's Club, Garden Section, Tamalpais Conservation Club, Sausalito Women's Club.

Bud Brownell Wins Peninsula Golf

Bud Brownell, Carmel's youthful golfer, won the peninsula open tournament when he defeated Joe Tomasello, Monterey ex-champion, 4 and 2 on the Del Monte course on Sunday afternoon. Tomasello was one up at the end of the morning 18 holes.

Peace Leader Speaks for Missionary Group

Mrs. L. K. Hutchens, noted peace worker, will be the guest speaker at the meeting of the Carmel Missionary Society at the Carmel Community Church next Tuesday at 2:30.

Mrs. Hutchens is a Smith College woman and has traveled abroad extensively. She continued her studies in Paris and later did settlement work in that city. On returning to America, she was associated with Jane Addams at Hull House in Chicago, and became a leader in organizing peace movements in Montana, Idaho and Wyoming. She has also made a special study of Jewish history and recently addressed the League of Women Voters here on that subject. The public is invited to hear Mrs. Hutchens.

Bandages will be rolled for hospitals in Korea from 10:30 to 12, and those taking part will bring their lunches.

Wormley Announces Programs for Forum

The final two programs for the Carmel Forum were announced by L. E. Wormley, director, at the lecture by Max Gene Nohl, deep sea diver, at Sunset auditorium Wednesday night.

The Iowa-born Countess Nostitz, who has seen revolutions in Russia, Finland and Spain, will speak on Friday, March 31, at 8 o'clock at Sunset. She will present the "white" and Francist viewpoint.

Only remaining program of the series will be Oswald Garrison Villard, editor of the Nation, on "Can the United States Keep Out of the War."

Ted Leidig introduced the speaker at the last Forum lecture.

No man is free who is not master of himself.—Epictetus.

Winners Announced For Essays On Americanism

The Carmel unit of the American Legion Auxiliary has been the sponsor of an essay contest conducted in Sunset school. The subject of the contest was Americanism and different phases of this subject were given to the various age groups for composition. These essay contests are conducted by the auxiliaries throughout the United States in order to stimulate respect, thought, and love for America. This is the first time the Carmel unit has sponsored this work.

Results of the contest, in the group embracing grades 7 to 9, the subject being "How Can I Help to Perpetuate Americanism?" are first, Lila Whitaker; second, Pat Tarrant; honorable mention, Cornelia Bell, Margery Street, Dorothy Ottmar, Martina Tait, Charles Heebner, Henrietta Erickson, Ruth Burrows, Joan

Newman, Jim Reichert, Meta Gossler, Elinor Smith, James Handley, Sandy Burhans, Doris Westcott, Charles Williams, Milton Thompson and Barbara Bott.

In the group including grades 5 and 6, the subject being "The Reason Why I am Proud to be an American", the winner was David Davis and second, Oliver Bassett. Those who received honorable mention were Esther Van Niel, Mat Reynal, Martin Irwin, Ann Hodgson, Joan Dekker, Pamela Dormody, Janet Strasburger and Doris Lewis.

The last group took in grades 1 to 4, and the subject was "Why I Love America." The winner was Elizabeth Klein and honorable mention went to Richard Morrison and Mildred McIntyre.

Each of the winners will receive a cash prize from the auxiliary.

New, 3 Bedroom House \$5,500

One of our "bargains." This is the best house-value on the market today.

The house rests on a gentle slope up from the road. It is long, with stepped-down roof-line. The artistic roof is of heavy hand-split shake.

There's a large living-room, with French doors opening in a potential garden at the back. Two large bedrooms, with closets, bath, off a hall to right. Opening off the living-room is a pleasant dining-room, with a most modern and well equipped kitchen. Back of that is another bedroom. Then there's a roomy kitchen-porch with tubs, etc. Garage. Large grounds.

It is a place for someone to live in. Gardening is needed, but that is all.

Blanding Designs Dinner Service

Carmel readers of House and Garden will be interested in the inside cover page of the second section of the April issue of the magazine. In the full page, full color advertisement for the Vernon Kilns it shows the new dinner service in Hawaiian motif designed by Don Blanding last summer here in Carmel. One is called Coral Reef and shows the busy fantastic life of the tropic seas with "gay little fishes with painted scales, gossamer fins and chiffon tails" swimming about among the submarine gardens. The other pattern is "Hawaiian Flowers", a lacy bouquet of white island flowers.

Blanding got a big thrill out of being teamed up with Rockwell Kent who designed the other two patterns for the Vernon Kilns' 1939 presentation. It is a new venture for Don and he was very much elated to get a commission to design two new patterns for the company.

ORDINANCE NO. 204

AN ORDINANCE CALLING, GIVING NOTICE OF, AND PROVIDING FOR A SPECIAL MUNICIPAL ELECTION TO BE HELD IN THE CITY OF CARMEL-BY-THE-SEA ON THE 4TH DAY OF APRIL, 1939, FOR THE PURPOSE OF SUBMITTING TO THE QUALIFIED VOTERS OF SAID CITY A PROPOSITION TO INCUR A BONDED INDEBTEDNESS BY SAID CITY FOR THE ACQUISITION, CONSTRUCTION AND COMPLETION OF CERTAIN MUNICIPAL IMPROVEMENTS, TO-WIT: THE CONSTRUCTION OF AN ADDITION TO THE RALPH CHANDLER HARRISON MEMORIAL LIBRARY IN SAID CITY, THE CONSTRUCTION OF A SIDEWALK AND RETAINING WALL IN AND ABOUT THE SAME, AND THE EQUIPPING AND FURNISHING OF THE SAID ADDITION.

WHEREAS, the City Council of the City of Carmel-by-the-Sea, State of California, on the 8th day of March, 1939, at a regular meeting of said Council, by the vote of more than two-thirds (2/3) of all its members,

to-wit, by a four-fifths (4/5) vote of all the members thereof, duly and regularly adopted its resolution No. 749 determining that the public interest and necessity demand the construction and completion of certain municipal improvements, to-wit: The construction and completion of an addition to the Ralph Chandler Harrison Memorial Library in said city, the construction of a sidewalk and retaining wall in and about the same, and the equipping and furnishing of the said addition;

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF CARMEL-BY-THE-SEA DOES ORDAIN AS FOLLOWS:

SECTION 1. A special municipal election is hereby called and ordered to be held in the City of Carmel-by-the-Sea, California, on Tuesday, the 4th day of April, 1939, for the purpose of submitting to the qualified voters of said city the proposition of incurring a bonded debt by said municipality for the construction and completion of said municipal improvements hereinabove mentioned and hereinafter described.

SECTION 2. The objects and purposes for which said indebtedness is proposed to be incurred, the estimated cost of said proposed public improvements, the amount of the principal of the indebtedness to be incurred therefor, and the maximum rate of interest to be paid on said indebtedness are as follows:

(a) The objects and purposes for which said indebtedness is proposed to be incurred are the construction and completion of the following municipal improvements, to-wit: The construction and completion of an addition to the Ralph Chandler Harrison Memorial Library in said City, the construction and completion of a sidewalk and retaining wall in and about the same, and the equipping and furnishing of the said addition.

(b) The estimated cost of said public improvement is the sum of \$6000.00.

(c) The amount of the principal of the indebtedness to be incurred therefor is the sum of \$4500.00.

(d) The maximum rate of interest (Continued to Page 15)

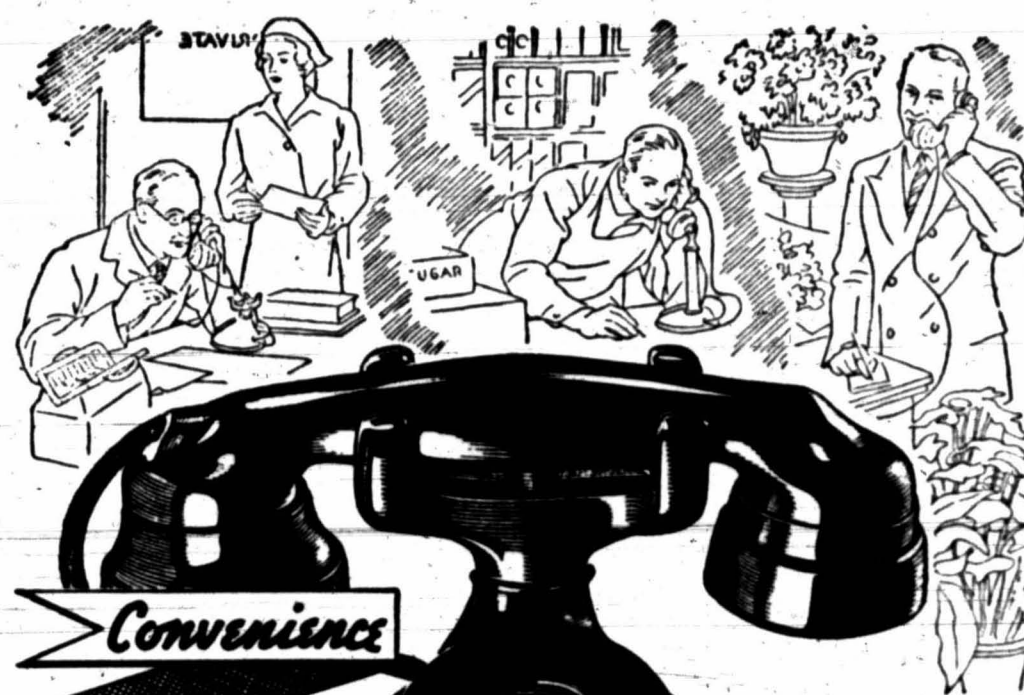

SECOND BRIDGE LECTURE

Ivy Oeschger gave the second of her series of bridge lectures at the Monterey Peninsula Country Club Saturday afternoon under the sponsorship of Kit Whitman of the Carmel Art Institute.

Men and Beasts — — — By PHIL NESBITT

Paris, the great French city by the Seine, may be apostrophized by the term "wench"—a French wench of the greatest antiquity, composed of a thousand facets ranging from the greatest grandeur and beauty to the lowest ebb of human experience. Thus, is Paris a wench of sorts—a sensual, Latin, pastoral lady, lying in undraped fashion by the shore of strangely fishless river (have you

ever seen those myriad Frenchmen fishing in the Seine's sterile waters?)

And then, there is our small town of Carmel, also lying by the shores of a river. This river of ours breeds many a plump trout, and many a liver-loving crawfish. Carmel is also a wench; a wench of different ilk. Carmel is essentially a female. Here, the women of Carmel rule. It's a matriarchal town. There are many

of the abstract elements which are in Paris, and, which compose that female quality. The undercurrents which flow in Carmel are boundless. Superficially, the aura of carnival and gaiety which distinguishes our little town is false. The undercurrents are greater, more tempestuous and more tragic than words can tell. In the middle of the night, Bob Norton's somewhat disturbing siren will sigh: a fight must be broken up. A driver will steer an erratic course down our distinctive main street; he must be apprehended.

But there is more than this. There are tragedies in the breeding stage, there are relationships of the greatest potential happiness being formulated; there are babies being born into this Vale of Tears. There are uncertain pups with the sting of rabies slaving their innocent jaws and a thousand and one additional facets and aspects of mortal living. Thus you will observe that Carmel is a wench, with maternal leanings, with constructive, destructive, oddly dangerous, oddly degenerative forces animating her powerful nature.

Weybret Backing Billboard Attack

Assemblyman Fred Weybret of Soledad today announced in Sacramento that he would exert every effort in behalf of passage of the "anti-billboard bill" when it reaches the assembly.

Listed as Senate Bill 1011, the bill introduced in the upper house by Senator Edward H. Tickle of Carmel would limit, regulate, and license all billboards on the state highways.

"Roads through the State of California pass through an almost unending panorama of native beauty," said Weybret, "and I welcome this chance to assist the move to reserve this scenic paradise."

There are also too many accidents due to the presence of billboards along the road, Weybret stated, and if by the simple expediency of eliminating the advertisements we may cut down this "toll of tragedy" we must assuredly must do so.

Despite the presence of powerful antagonists to the bill, it is thought by seasoned observers that its passage was assured.

Christian Science

"Whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things." These words from Philipians comprise the Golden Text to be used Sunday, March 26, in all Churches of Christ, Scientist, branches of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The subject of the Lesson-Sermon will be "Reality." Included among the Scriptural selections will be: "One generation shall praise thy works to another, and shall declare thy mighty acts . . . They shall abundantly utter the memory of thy great goodness, and shall sing of thy righteousness" (Ps. 145, 4, 7).

The following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, will also be included. "It is unwise to doubt if reality is in perfect harmony with God," divine Principle,—if Science, when understood and demonstrated, will destroy all discord,—since you admit that God is omnipotent; for from this premise it follows that good and its sweet concords have all-power" (p. 130).

From The Pine Cone's Old Files

MARCH 22, 1916

For months a campaign to raise funds for Carmel fire fighting equipment has been carried on but to date the total amount subscribed toward the required \$100 has been \$27.50.

— 23 years ago —

A school trustee is to be elected next month to succeed Mrs. J. W. Hand, whose term expires.

— 23 years ago —

It is rumored about town that efforts are being made to consolidate the Forest Theater and the Western Drama Society.

— 23 years ago —

For Sale: House and lot with barn. House contains bedroom, living-room, sleeping-porch, kitchen, bathroom. Lot 100 & 100. \$1,000. For Rent: Four-room cottage on Casanova street and Tenth avenue. \$15 winter months, \$30 summer months. (Advertisements).

— 23 years ago —

Social and Personal: Sir Francis Webster, Lady Webster and son are spending a few days at Del Monte prior to their departure for Boston. Sir Francis presented to Mrs. Signor a large canvas water cooler, and one for butter, which he ordered made by a firm in San Francisco, similar to those used on his estate in Scotland, where ice is scarce.

— 23 years ago —

Contractor M. J. Murphy expects to have the new Watts residence ready for occupancy in about three weeks. Mrs. Watts has returned from the East.

— 23 years ago —

Miss Eunice T. Gray, head of Academy Hall, a school for girls at Jacksonville, Ill., has decided to remain there for another year.

— 23 years ago —

Leidig Night at Carmel Hotel last week was a success, when the birthdays of Clara and Bob were celebrated. Mrs. Robert Leidig decided on a surprise party for which the company of about 30 guests met at the Hicks' home. Altogether there were eight Leidigs present, headed by Bob, Fred, Ben and Lawrence.

MARCH 20, 1926

Candidates for the city board of trustees are: T. L. Edler, restaurant owner; Fenton P. Foster, building and loan official; Mrs. Mary L. Hamlin, retired business woman; Richard H. Hoagland, former federal employee; John B. Jordan, business man; William T. Kibbler, present mayor; Alfred K. Miller, capitalist, and George L. Wood, retired business man.

— 13 years ago —

The proposal to put in a filtration plant to take care of Carmel sewage is not favored by owners of property in the vicinity of the septic tank south of the city. Among those protesting against a temporary plant which might become permanent are S. A. Trevett, Walter E. Egan, Frederick Godwin, Harrison Godwin, Lydia G. Weld, Mrs. F. M. Thatcher, G. M. Fullager, Marion Clark, Helen L. Draper, Katharine M. Roberts.

— 13 years ago —

Mark Sullivan, brilliant journalist and political commentator, will give a lecture tomorrow at the Golden Bough. He is being brought here by John B. Jordan.

— 13 years ago —

Contractors Lee Gottfried and Don Hale are building the Joseph Schoeninger house on the Point; Dene Denny and Hazel Watrous are beginning their studio on Dolores; Percy Parkes has finished the Burnham building on Dolores; and M. J. Murphy is building the Andrew Stewart place in Carmel Valley.

— 13 years ago —

Mrs. Valentine Mott Porter is back from the East after seeing practically every play from "Able's Irish Rose" upward.

— 13 years ago —

Mrs. Barbara Pfeiffer, long a Big Sur resident, died last week at the age of 93.

— 13 years ago —

The Theater of the Golden Bough is preparing for productions of "What Price Glory", "The Hairy Ape" and "The Man Who Ate the Popomack."

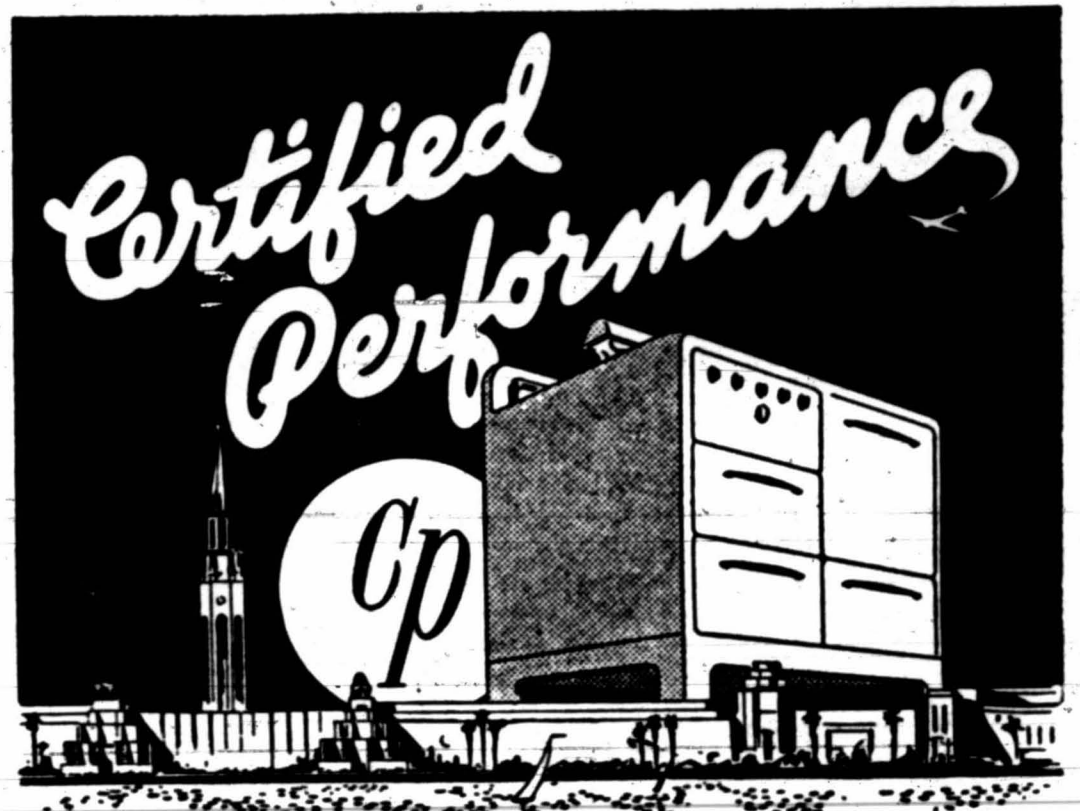

FRONT END NOISE

Noise in the front end of cars with the coil spring type of knee-action may be caused by sand or gravel on the spring seat, according to the Emergency Road Service of the California State Automobile Association.

Salute to a Living Art

By BARRIE O'SHEA

On with the dance, although in distant skies we hear the ominous rumble of approaching chaos. Yet with infinite disdain the music of the dance swirls and eddies gayer, more lilting, to a crescendo as the beautiful music of Johann Strauss once more resounds through the modern dance with all the graciousness that made it beloved of the Emperor Franz Josef.

Again we have the hoop skirt and the Viennese Waltz enjoying a wave of popularity throughout the smart world. When you dance request a Viennese waltz. Do the two-step turn

that you did to the old-fashioned waltz, in three-quarter time, which is faster and smoother, and you will derive a greater pleasure from this tempo.

Another step very popular and very effective is the off-side turn. This step is accomplished by turning to your left in the opposite direction from the natural turn that you do in your old-fashioned waltz. The beautiful ghosts of yesterday will be dancing by your side, and their laughter will mingle with yours as the Vienna of old lives again.

Faintly out of the unexplored jungles we hear the insidious beat of the

tom-tom. La Conga takes its place among the dances of this day. La Conga is a simple primitive rhythm. Stressing the first three beats and accenting the fourth. You will enjoy this dance if you will allow yourselves to understand it. It is a virile, intoxicating, blood-stirring rhythm.

A word about the modern fox-trot. Good taste, consideration of others and a sense of the fitness of things inspires nice dancing. So dance smoothly and easily with great care that you do not bump other dancers. In other words: Do unto others as you would have others do unto you. Do not clutch your partners and do not watch your feet. In most cases you will find, they are large enough to take care of themselves.

If then, you will help us help you, we will respectfully submit dancing minus confusion. A flight of stairs leading up beyond our vision to the dancing floor of all our dreams. And so, until next week!

Many free countries have lost their liberty, and ours may lose hers: but if she shall, be it my proudest plume, not that I was the last to desert, but that I never deserted her.—Abraham Lincoln, 1839.

GET PLUS VALUE

IN THIS SENSATIONAL NEW GOODYEAR G-100 ALL-WEATHER TIRE AT LOW COST

PLUS VALUE for you is evident in every one of the features of the new first-choice Goodyear G-100 All-Weather... you get as much as 33% more tread mileage, greater resistance to injury, improved "All-Weather" center-traction with close-set diamond blocks, 11% more rubber on the road, new low-stretch cords to guard against bursts and bruises, four riding ribs for quiet, easy-roll ride, new streamlined style! ... All to give you utmost safety at your LOWEST COST-PER-MILE.

START SAVING TODAY
"Lifetime Guarantee"...
Goodyear's and our own

GOODYEAR ALL-WEATHER BATTERIES

Goodyear's standard battery. Powerful and dependable. Extra-heavy plates. Guaranteed for 18 months or 18,000 miles. **AS LOW AS \$4.95**

A Lecture on Christian Science Entitled "Christian Science: The Way of Salvation and Healing"

Miss Florence Middaugh, C. S., of Los Angeles, Calif., a member of The Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, delivered a lecture entitled "Christian Science: The Way of Salvation and Healing" Sunday afternoon, March 19, 1939, at 3:00 o'clock in the Sunset Auditorium, Carmel, under the auspices of First Church of Christ, Scientist, Carmel.

The lecturer was introduced by Mr. Russell Field, who said:

Friends: I am pleased to welcome you in behalf of First Church of Christ, Scientist, in Carmel.

Mrs. Eddy writes in *Science and Health* (page 46): "The divine Spirit which identified Jesus thus centuries ago, has spoken through the inspired Word and will speak through it in every age and clime. It is revealed to the receptive heart, and is again seen casting out error and healing the sick."

Years ago Christian Science was brought to my attention through witnessing the healing of a malignant form of disease after the case had been declared incurable by eminent physicians. The healing was so thorough and complete I at once recognized that a scientific law had been applied to that case and I desired to understand how the healing had been accomplished. I eventually saw that the divine Science of man as taught in our text book is woven into one web of consistency which heals sickness and sin.

It is a pleasure to introduce one who is well qualified to address us on this important subject—a member of The Board of Lectureship of The First Church of Christ, Scientist, in Boston, Massachusetts.

I take great pleasure in presenting Miss Florence Middaugh of Los Angeles who will speak to you on the subject of "Christian Science: The Way of Salvation and Healing."

The lecturer spoke substantially as follows:

Christian Science is satisfactorily answering questions and solving problems which have baffled and perplexed mankind for centuries. Perhaps the correct answer to these questions and the solution to the problems have not been found before because they have not been approached from the right standpoint.

Christian Science is teaching mankind how to think correctly.

Many of you here may have questions which you hope Christian Science can answer for you. This very hope, which brings most of you here, places you, to a certain degree, in an attitude of receptivity to Truth. In the case of some of you, this hopeful receptivity has reached a state of joyful expectancy. This, I believe you will readily admit, indicates qualities of thought. If so, then you will agree with me before we start that whatever your need may appear to be, it must be dealt with through your thinking. Whatever change in your present experiences you would like to take place, you desire, primarily, peace of mind.

Since we have gathered here to ascertain how Christian Science answers your questions, we shall examine its teachings in regard to them. The word "science" comes from the Latin word "scire," to know. Then Christian Science is a knowledge of Christianity, the Science of Life, the facts that govern being, the truth about God and man, and the universe, and their relationship. Christian Science is based upon the teachings of the Bible, the inspired word of the Scriptures. It does not deviate from the Christianity which Jesus taught, demonstrated, and lived.

Discovery of Christian Science

Mary Baker Eddy, the Discoverer and Founder of Christian Science, was specifically prepared for this spiritual revelation during many years before it came to her. From early childhood she was an earnest

student of the Bible, and it was to this Bible that she turned for comfort, guidance, and enlightenment in times of stress. Was it extraordinary or unnatural, then, that in the hour of greatest need, when all human aid had failed, when she was pronounced fatally injured from a fall, following many years of invalidism, she should ask to be left alone with her Bible? She turned to the book of Matthew, and in following Jesus' healing ministry, so familiar and dear to her, for the first time she perceived the spiritual import behind those healings, and glimpsed something of the power of divine Mind, God, which operated in what we have believed to be miracles. So positive and vital was this illumination that she arose from her bed, where she had been left to die, revived and vigorous, dressed, and went in to the astounded and incredulous assemblage of friends and relatives.

To some this might have been satisfaction enough; she was restored, whole; but the desire to place this healing truth within reach of all mankind became a sacred responsibility to her. So she separated herself from all other activity, and in seclusion for three years probed and pondered the truths within the Scriptures, subjected them to the broadest possible tests, and on page 406 of "Science and Health with Key to the Scriptures", the textbook which was the result of this search, she states unreservedly, "The Bible contains the recipe for all healing."

It is not strange, then, that you should turn to this Science to still the anxiety and unravel the perplexities that trouble you.

Jesus

Centuries ago, we are told in the Gospel of John, Nicodemus, a great scholar, went to Jesus under cover of the night, perhaps lest anyone might wonder that he, with his store of material knowledge, should be seeking information from the humble Nazarene, who was not looked upon as a man of letters.

Jesus at once saw that the reason for the bewilderment and confusion concerning his ministry, which prompted Nicodemus to come to him seeking explanation and enlightenment, was a false concept of God, man, and the universe. From his puzzled inquiry, "How can these things be?" Jesus perceived that Nicodemus could not understand his teachings from a material standpoint and that he must exchange his false concept for the right one, and he answered simply, "Ye must be born again."

We can well imagine the even greater consternation which followed this pronouncement. In one brief moment Nicodemus probably reviewed the history of his human birth, growth, development, and maturity, and it, no doubt, seemed to him a most preposterous thing that this should be done all over again. But Jesus was not speaking of his human origin and birth. He knew that the only true growth and lasting development is the unfolding of spiritual ideas. He spoke of the renewing of the mind, a change in the basis of thinking, which was difficult for Nicodemus to comprehend. Jesus saw and recognized but one God, and one man, the man of God's creating, not struggling and working out of materiality, harassed and disturbed by its problems, but existing at the standpoint of wholeness and completeness. It was this true view of man as the son of God that enabled him to heal the sick, cast out devils, and raise the dead.

It was to God that Jesus always turned for wisdom and strength, for it was his mission to prove God's allness and man's oneness with Him. Christian Science teaches this same God. In giving the platform upon which the teachings of Christian Science stand, Mrs. Eddy writes on page 330 of the textbook: "God is what the Scriptures declare Him to be,—Life, Truth, Love." It is the spiritual

import of the Scriptures, and practical application to daily life that Christian Science is teaching us—how to make these truths live and move in us.

Creation

There are two divergent accounts of creation in the Bible. There is a record of both a spiritual and a material birth of man, with two different creators. We cannot consistently believe or accept both of them, for each denies the validity of the other, and both, therefore, cannot be real and true. The account of creation in the first chapter of Genesis is the one which Christian Science reveals to be the true record.

Following the record of the spiritual creation, in which God pronounces everything He has made to be perfect and intact, and very good, is a second record beginning with the statement, "But there went up a mist from the earth," after which appeared a material sense of creation, with the Lord God as the creator of it. Through this suppositional mist one is led to believe there arises a counterfeit creation, a counterfeit man and universe, and in it he sees sin, sickness, and death. Not one of these conditions is any more real than the mist itself. They are not included in God's creation, and He made everything that was made. In God's perfect universe there is light, and there was no mention of the possibility of a mist that might arise and obscure or dim that light. But so long as mortals believe in the mist of materiality, which obscures the true creation, they will argue and suffer accordingly.

Christian Science assures us that we have the power to refuse to accept this counterfeit creation. It supplies us with the spiritual enlightenment which dispels the mist of materiality and reveals God's universe and man as perfect as they were created. It answers the question, What am I to God? as well as, What is God to me? In other words, What is man's relationship to God? It reminds us, as Jesus did Nicodemus, that in order to gain this enlightenment we must be born again, and further teaches us how this can be done. Nicodemus, no doubt, knew these two records the same as Jesus did, but we find Jesus serene, confident, undisturbed in the strength of spiritual understanding. We find Nicodemus doubtful, limited, and uncertain.

Finding God

It is safe to say that practically everyone believes in a supreme being, a power greater than himself. Because the individual concepts of the creator may differ, some may say, There is no God, but by this they generally mean that they do not believe the concept of God which has been presented to them, or which they have formed in their own consciousness. Of course, the widely diverging theories concerning God could not change His nature or being, nor would it be possible for Him to coincide with all the differing concepts. Then we must rightfully conclude that only one concept can be true, and it is necessary for us to find out which one is true and conform our lives in accordance with it.

When you ask the question, How can I find God from where I am? the question follows, Where are you? Simply and directly answered, you are just where and what you are thinking about God. One of the first and most important things to understand about God, is that He made everything, but He did not make part of His creation good and part evil. Then the puzzled inquirer may ask, Well, if this is true, how do you account for evil, and how does man find himself in this material universe? A complete answer to these questions can be found only through growth in spiritual understanding. The Scriptures declare that God is "of purer eyes than to behold evil." Therefore man, made in His image

and likeness, could not behold aught that God does not know. Spiritual man could never find his true selfhood in materiality. The ailness of God destroys the seeming actuality of evil and it is only as one gains a comprehension of God's allness that the unreality of evil becomes apparent. The suggestion that spiritual man can dwell in a material universe is only part of the deceptive belief and is destroyed by the true concept of man and the universe. This true concept, however, is not gained by keeping the eyes on the level of materiality. There must be lifting up—a looking up and away from sense testimony, which defrauds, cheats, and lies. We must climb to the heights where the view is unobstructed. Those who have climbed to the top of the mount of revelation, even to behold the new heaven and the new earth, have told us of the vision, that we, too, may have courage and hope, and enlarged perception to rise above the mist.

Surely you will be glad to know that God never made a sick or sinful man. He who believes there can be any man besides the one made in God's image and likeness should be willing to let go of it when he remembers that this false belief has brought nothing but discord and dismay.

If I were to tell you that by dividing a sum you would get an added amount instead of less, you would not believe me because your understanding of the law of mathematics denies it. If you ever did believe it, it brought wrong results, and when you found you were mistaken, you gave up the erroneous conception gladly, because when you applied the truth of that mathematical rule you got the right answers to your problems. A mistake is brought about through a wrong process of reasoning, and the discordant results disappear when the mistake is corrected. It is thus when we exchange a false concept of God for the real one, and when we put off the "old man" and put on the "new man" we have no regrets.

Man

This "new man", Christian Science teaches, is the real man, and Mrs. Eddy describes him in *Science and Health* (p. 475) as "the compound idea of God, including all right ideas; the generic term for all that reflects God's image and likeness." So man, made in God's image, reflects, expresses God, and could not express anything unlike Him. But this is not the man the five physical senses tell us about. They present a man whose consciousness is more or less filled with thoughts of God's unlikeness.

The world has long battled over the question, What is man? The Scriptures plainly tell us that man was made in God's image and likeness. Then as God is Life, Truth, and Love, the real man is the reflection of Life, Truth, and Love. He is inseparable from his creator. He is not mortal; he is immortal. He is not material; he is spiritual.

The student of Christian Science demonstrates the truths of its teachings only in proportion to his understanding and correct application of its rules. But it is true that since Christian Science was discovered, and the art of divine healing again given to the world, through the application of its teachings thousands have demonstrated the healing of all manner of disease, and the successful overcoming of countless inharmonious conditions, thus proving its efficacy, and that nothing of good is impossible of accomplishment to those who seek God with all their hearts. And one does not need to be satisfied with half a blessing. Jesus declared, "Your Father knoweth what things ye have need of, before ye ask him." Only formerly we may have inverted the interpretation of this, trying to make God manlike in a consciousness of human needs. Might it not more logically mean

that our need is for the things our Father knoweth, such as wisdom, intelligence, understanding, love? If we have these things, no good could be lacking.

The Kingdom of Heaven

God, the universe, and man co-exist and are coeternal. They are inseparable. Therefore man could never fall from his high estate; he could never be out of the kingdom of heaven, nor from under God's loving care and protection, or fall into a universe of uncertainty and imperfection. He always has been and always will be at one with God.

In the *Glossary of Science and Health* we find the definition of the kingdom of heaven as follows (p. 590): "The reign of harmony in divine Science; the realm of unerring, eternal, and omnipotent Mind; the atmosphere of Spirit, where Soul is supreme."

Jesus taught many spiritual truths, especially concerning the kingdom of heaven, by parables. Through these simple stories of things familiar to the people they were often better able to comprehend his meaning. One of his best-known parables is woven around a young man who believed that he could be separated from his father and his rightful heritage, a son who gathered together his portion of the inheritance and traveled far away, and indulged in an orgy of careless waste, even until he suffered in the very depth of degradation and want. When he realized his mistake, however, he did not let a false sense of pride further delude him into refusing to acknowledge it. On the contrary, he determined to return to his father's estate in humility and repentance, willing to serve and prove himself worthy. When the other son protested that he should be allowed to share the same blessings with the others, the father's answer is what God is continually saying to each one of His beloved children, regardless of how far away they may think they can stray, "Son, thou art ever with me, and all that I have is thine."

Do we read this merely as an interesting story, appropriate only for that time, or do we see that it is applicable to our lives today?

Dr. Edward S. Woods, in a book called "Everyday Religion," tells the story of a Korean who went to a missionary one day and said, "I have been memorizing some verses in the Bible, and I have come to recite them to you." The missionary was surprised that he could repeat the entire sermon on the Mount, without verbal error. He complimented him, and said: "You have a marvelous memory to be able to repeat this long passage without a mistake. However, if you simply memorize it, it will do you no good; you must practice it." The Korean Christian smiled and replied, "That's the way I learned it." When asked what he meant, he said: "I am only a stupid farmer, and when I tried to memorize it the verses wouldn't stick. So I hit upon this plan. I memorized one verse and then went out and practiced that verse on my neighbors until I had it; then I took the next verse and repeated the process, until I had learned it all."

Mrs. Eddy says (Message for 1901, p. 11), "To my sense the Sermon on the Mount, read each Sunday without comment and obeyed throughout the week would be enough for Christian practice." Obeyed throughout the week, not just read on Sunday and forgotten throughout the week.

Jesus made it possible for all to follow his example, by giving us the perfect pattern. His teachings are simple and direct. He depicted the attributes of his own character in the Beatitudes, and his Sermon on the Mount does not ask us to do anything that he did not live and practice himself.

You will notice in your study of (Continued on next page)

A Lecture on Christian Science Entitled "Christian Science: The Way of Salvation and Healing"

(Continued from page 8)

the Beatitudes, which preface the Sermon on the Mount, that Jesus exalted those traits of character which the world does not generally look upon as important or worthy of acclaim. But he declares that the very highest awards of heaven and earth are given to the meek, the poor in spirit—those who recognize their need of spirituality—the pure in heart, the peacemakers, and so on. To those he promises the richest of rewards—the kingdom of heaven that they may inherit the earth, and even see God. Full recompense is promised for those who patiently and uncomplainingly journey onward in spite of persecution, criticism, and misunderstanding. We do not need to translate the Beatitudes into terms of modern living, but we do need to translate our everyday lives into the terms of the Beatitudes.

While in the Beatitudes Jesus enumerated the blessings which are received by those who follow his example in deed and in truth, in the Sermon on the Mount he explained more fully just what one must do in order to enter into the kingdom of heaven, a harmonious state of existence. It reminds us that if we want to be well or happy, contented or successful, we need first to start mending and building character, purifying and unselfing motives and aims, that we must bring love, mercy, justice, et cetera, into our dealings with our fellow men. Then, soon we shall find that the good things for which we pray to our heavenly Father are ours; we have always had them. Sometimes we fail to receive answers to prayer because we have let selfishness, greed, hatred, impurity, injustice, and hardness of heart build a stone wall around us through which little of the sunshine of God's love can penetrate and get to us.

One of the most impressive truths ever given to the world is that "God is love." The Apostle John declared it and the Discoverer and Founder of Christian Science reminds her students over and over again that without an understanding and consciousness of this Love they cannot hope to accomplish anything—that it is the very core of their religion. What is this Love which is God? Is it like unto human love, which may turn to hate, which selects a choice few for its favor, which possesses, and loves its own better than another's? The Love which is God is never absent, never cold or unyielding. It is universal, impartial, changeless, infinite. It is the most effectual and lasting remedy for any evil.

Suppose you just try for one day and see what this Love will do for you. There is no difficulty that can confront you that will not respond to the healing influence of Love, divine Love, if you will express it. If you do not know how, you can learn how. There is not one of us but needs to express more love. There is nothing that Love cannot heal, or reach. But it is divine Love within you, expressed by you, that meets your need, and the need of those who come in contact with you.

Healing

Religious creeds and doctrines for centuries have extended to the sinner a hope of forgiveness and salvation, but to the sick and suffering they have offered no such promise. In the Christian Science textbook Mrs. Eddy states (p. 166) "To ignore God as of little use in sickness is a mistake. Instead of thrusting Him aside in times of bodily trouble, and waiting for the hour of strength in which to acknowledge Him, we should learn that He can do all things for us in sickness as in health."

Christian Science teaches that when God says to His children, "All that I have is thine," He means just that, and that this means Life, which includes health, Love, which includes happiness, and Truth, which includes wisdom and understanding.

Mortals ask God to forgive their sins, but turn to physiology or anatomy to tell them how to take care of their bodies, and give them health. They would place life in a material body, and look to matter to instruct them how to care for their bodies in order that life might be preserved. Contrary to this view, Jesus emphatically said, "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent."

One may say, Would you have me neglect my body and live in defiance of the laws of nature? Christian Science makes it clear that the human body is harmoniously governed when controlled by right thinking, and that it responds at once to an improved condition of thought. Within the last few years there have been many indications, evidenced by articles in the newspapers and magazines, that the doctors are taking more and more account of the state of their patients' thinking.

The source of all physical discord is the mistaken belief that Mind is in matter, that life is in the material body. The material body is mindless, sensationless, inert, and can of itself offer no complaints. Its only claim to existence is your belief in it, and you give it all the activity it seems to have, whether you think harmoniously or inharmoniously about it. Any belief that man is subject to laws which deny the omnipotence and omnipresence of God, good, is an illusion—a false supposition, whether it appears to come from within your own thinking or as a suggestion from without.

Mind

God is Mind, and since there is but one God, there is but one Mind. Let this divine Mind govern your thinking and it will control all that your thoughts rest upon.

Students of Christian Science, when they become members of The Mother Church, subscribe to the Tenets of that church, among which is the promise to pray and strive earnestly and continually for that Mind to be in them which was also in Christ Jesus. Jesus was the human concept, but the Christ, with which he was endowed, is the spirit of God, the divine manifestation of God which is as present today with us as it was with him centuries ago. It was the Christ spirit which was in Jesus that made him one with God, giving him power to do many mighty works in his Father's name. Some may think that Jesus was especially endowed with spiritual power, not intended for anyone else; but Jesus himself has assured us repeatedly that if we believe on him, and understand his teachings, we can do the very things he has done.

That which sins, suffers, and dies, Mrs. Eddy names mortal mind, and among other things she designates it as a myth, unreality, because it is the opposite of divine Mind. Mortal mind has not one quality of substance, life, intelligence, or truth. It can in no way enable man to behold himself as God's reflection. Matter can take no cognizance of Spirit, for matter is the supposed creation of mortal mind.

It is through reason, that most active of human faculties, and through spiritual sense, that one learns to distinguish between divine Mind and mortal mind, and when one recognizes that man is governed and controlled by God, good, divine Mind, he sees that he need no longer be subject to the vagaries of mortal mind.

Inharmonious conditions are not always the result of sinful thinking, but they are the result of erroneous thinking, wrong reasoning, and the place where one needs to start, continue, and finish working for correction, reformation, and adjustment is right within himself—within his own thinking. In that domain he reigns supreme. He may censor what comes

in and what goes out, and as he does this he need not be surprised if he finds things brightening up around him.

Do not be reluctant to look within. Do not be too sure that all the wrong conditions are on the outside, or that if you had a different environment, a better atmosphere, or more opportunities, more congenial associates, everything would be all right. The change for better must first take place within you, within your consciousness; for wherever you go, and whatever you do, you take this consciousness with you which determines your outward experiences.

There was a young woman who, when she began the study of Christian Science, was suffering from physical ailments, culminating in what was pronounced by the family to be a nervous breakdown, followed by the declaration that she probably would never be strong enough to lead a normal or active life. Very soon after she began to study Christian Science she realized that what she was really was suffering from was a bad temper, believed to have been inherited. This she had often regretted, but not knowing how to correct it, as she grew to womanhood she had allowed many unlovely traits of character to develop and fasten themselves upon her, together with the attending physical discords. She saw that her part in the healing was to strive to eliminate this ugly disposition, which she set about earnestly to do. For her it seemed a long process, but through the striving she grew in spiritual understanding, and when the demon of evil temper had been cast out, her health was restored and she became a useful and active citizen. This woman told me that those years of struggle had taught her what it really means to strive, and that the growth in spiritual understanding was much more precious to her than the physical harmony which had resulted.

Prayer

Christians rightfully believe that man approaches God through prayer. But in that hour of trial when one seeks to pray he may cry as Job did, "Oh that I knew where I might find him!" If one does not understand what God is, he does not know when he has found Him.

As long as there have been religious creeds and doctrines they have included prayer, but the concept of prayer has been as varying and divergent as the creeds themselves.

Since Christian Science accepts Christ Jesus as the Way-shower, we believe that we can have no better example than he has given us in this respect. When the need arose, Jesus withdrew from the world to commune with his heavenly Father, to draw closer to Him. His prayers were an acknowledgment of God's goodness and power, and he never doubted God's willingness and ability to provide all good for His children. In teaching his followers how to pray, Jesus said, "And all things, whatsoever ye shall ask in prayer, believing, ye shall receive." From this we may reasonably assume that Jesus' prayer was not one of petition only. He usually prefaced his prayers with thanks to God; he prayed the prayer of gratitude.

Gratitude plays such an important part in our experiences that it is well to stop often in our busy lives and take time to give thanks to God for just being God. Working, watching, searching, and endeavoring to understand God, expressing gratitude for His goodness, is prayer. This is not an arduous task, but, on the contrary, it is joyous, refreshing. Jesus promised that those who really hunger and thirst for righteousness shall be filled.

Have you ever known the pangs of hunger? Perhaps some of you have. But have you ever been hungry with no immediate prospect of relief? When you reach that stage you make a more determined effort to remedy

it. And so he who hungers and thirsts for righteousness—to know God and His thoughts—will make a definite effort to find Him. When men understand the true nature of prayer they will realize how it is not only possible, but necessary, to pray without ceasing, as Paul admonishes us.

Prayer, as understood in Christian Science, establishes receptivity to right thinking, and opens the way for the fulfillment of God's promises. It makes us realize that we can always pray to God, for He is omnipresent, and always right where we are. True prayer is the beginning of right activity, for it is the beginning of right thinking. It lifts human thought above the mist of materiality into the atmosphere of spiritual reality. Every honest desire to be better, to reflect more of Love, more of good, is a prayer that will never go unanswered. Every effort for reform, to leave off sinful habits and thinking, is a prayer that is answered.

True prayer obviously does not seek to change that which is real, nor entreat God to change His perfect creation. It does not ask for more blessings, new life, greater power, but that the eyes may be opened and the vision cleared, that the ever-presence of God and His great power and abundance may be recognized here and now. Christian Science teaches us not only how to pray, but how not to pray amiss.

Christian Science Treatment

Some of you here may perhaps have sought healing through many material means or physical methods before coming, in your extremity, to Christian Science, to find out whether or not it really does heal, and, if so, if it can heal you. While you were doctoring and examining the body for cause and effect, did you take time to consider and analyze your thoughts to see if there was any resentment, fear, grief, remorse, criticism, et cetera, rankling therein?

All the medicine that you could pour into the body would not counteract the bad effects of these destructive thoughts. I know a person who was instantaneously healed of a discordant condition of the skin when she realized that fear was all there was to it—that the intense fear in her thought was manifesting itself on her body. That which had developed in severity and intensity for many weeks disappeared almost overnight, and within a few days left without the slightest scar. She said that she knew the exact moment when the fear left her thought, and that the irritation of the skin ceased at that moment.

Truth heals instantaneously. God spake and it was done. It doesn't take time to know the truth about anything, but it does take receptivity of thought. When one came to him seeking healing, Jesus' spiritual perception enabled him readily to recognize whether or not the seeker was sincere, receptive, or had faith, humility, and willingness to be obedient to the law of God. When his disciples failed to heal a case brought to them, and asked Jesus the reason for their failure, he told them it was because of their unbelief—because they didn't have faith enough.

The healing of disease is of itself only a sign. Spiritual growth is the ultimate of all healing. One may acquire added spirituality in the process of a slow healing, but this does not imply that an equal amount of spiritual growth could not have been attained otherwise. God supplies all good continuously, so we may make use of it at once. If a lack of good seems to be apparent, it is because God's law has been misapplied or misunderstood.

A person may fall into the habit of accepting the argument that certain errors take longer to conquer than others. God, Truth, knows nothing of error of any kind, and thus knows nothing of the mortal measurements called time, so this element

of mortal mind could not possibly govern the operation of divine Mind. God knows nothing of the degrees which mortal mind would seek to establish. Whether one difficulty is more trying than another, more lasting, or more severe, is all the mesmerism of mortal mind, of which divine Mind takes no cognizance.

The absent treatment was practiced by Jesus, for instance, when the nobleman came to him in Galilee and asked him to heal his son who was sick at Capernaum. Jesus told him to go back home and he would find that his son was healed. When he inquired of his servants at which time his son recovered, he knew that it was at the same hour when Jesus spoke to him. This proved that neither time nor space was a factor in the healing.

The absent treatment has been thousands of times successfully given in Christian Science practice. Its students have proved beyond dispute that divine Mind is just as present with the patient as with the practitioner, and that the proximity of the two is not a necessary factor in healing. The seeming obstacles of time and space, whether they be small or great, are only part of the many arguments of limitation promulgated by mortal mind.

Salvation

How much of this Science one understands and makes practical in his daily life depends upon his receptivity, willingness, obedience, and perseverance. What he proves and makes his own is based upon the consecrated effort he puts forth in the right direction.

The Science of Life can be applied and proved only through living. A God of love can be comprehended only through expressing love, giving love, and being loving. Truth can be understood only when demonstrated and practiced. And he who knows the truth and yet does not practice or prove it is building his own prison walls, not helping to tear them down. Mankind has too long accepted the theory that salvation is a future state to be acquired—a promise for hereafter, to be attained after death. Since now is the only time of which we can ever be conscious, is it not reasonable to conclude that that which can come only at a future time will never arrive? It is always just beyond reach.

And there is only one road to salvation, which we are told is straight and narrow. But, one may say, that sounds rather limited and restricted. It is straight in that there are no byways nor detours. It is direct and without digression. Its singleness of purpose has no room for suppositions, conjectures, theories, or human opinions. It travels straight ahead, and in one direction—on and up, and out of all the evil that flesh is heir to. There is no place for any excess baggage. On this road it is truly said that he travels fast who travels light.

I sometimes think it is referred to as narrow because it must be traveled.

A RABIES QUARANTINE

No one would deplore a peninsula-wide rabies quarantine more than we would, for many reasons both in the interests of the three communities and personal ones. A rabies quarantine would mean a serious loss of tourist business which naturally affects merchants and property owners. It would mean a heavy increase of activity for the S. P. C. A. with consequent added costs for additional manpower and overhead, although it would be less worry for parents whose children roam the town. It would be a temporary black eye for the peninsula.

On the other hand there is probably no more awful death than by rabies nor is there a disease more certain to be fatal. Fortunately science has found a treatment for the bite of a rabid animal if taken in time.

In the last five months there has been a total of 11 dogs positively diagnosed as being rabid on the Monterey Peninsula, which is enough to warrant a quarantine at any time. There have been a number of suspected cases but we are disregarding those and following only known cases. More figures released by the county show that of 68 individuals bitten, there were 17 known to have been bitten by rabid animals and fortunately treated in time.

It is interesting and encouraging to note that of the positive cases and also of the "suspicious" cases laboratory reports disclose that not one has been from Carmel, showing that the disease has not spread over the hill. Should the infection reach our village, we would have a sad time indeed, considering the numerous pets we have here.

If human nature was all it should be, it would be a good idea if each individual pet owner would himself impose a quarantine on his pets, and wherever possible keep his animals locked up for several months, or in case of dogs, to at least keep them on a leash. In this way we might be able to combat the disease without official action and the attendant publicity of a rabies quarantine. It should work if people would only cooperate, but sadly we shake our head, knowing that we are only going to be called idealists and told that people don't do things like that, but have to be legislated into action even for their own good.

SCHOOL BONDS SOLD

Taxpayers of Sunset School District can congratulate themselves on the highly favorable terms on which the \$165,000 par value of bonds have been sold. The purchaser was the bond house of Schwabacher and Company of San Francisco, with offices at Del Monte. The rate of interest which the taxpayers will have to pay over the twenty years until maturity is the low one of 2.65 per cent.

The bonds maturing in the first three years bear interest at five per cent per annum and the subsequent maturities $2\frac{1}{4}$ per cent per annum.

The purchasers also paid a small premium of \$250.

Our readers will be interested in the financial statement of the Sunset School District as exhibited in the circular of the bond house:

FINANCIAL STATEMENT

Assessed Valuation	\$9,369,567
Bonded Debt, including this issue.....	237,500
Overlapping Debt	179,723
Population (estimated)	5,000
Tax Delinquency, 1937-1938	3.84%

Now that money for a high school is available we hope that a site will harmoniously be decided upon at an early date and ground broken so that September, 1940, will see our youth occupying the benches of our Sunset High School.

—J. L. C.

AND AFTER DARKNESS

*This is my spring. I have known others, true,
But never one like this. Now is the time
When April will be more than bud and shower,
More even than a young, shy-tilted moon;
When May will burn above the primrose dusk,
The lilac dawn, with light which never glows
Save in the soul which has known dark and storm
And blood poured out upon unyielding ground.*

*This is my spring. I shall smell earth again
And speak with trees; I shall hear surging water
The wind of life and unforgotten things.
But more than this, I shall feel space and time
Within my heart; the universe my road;
And all the mountains of this little world
Will step to lead beyond the last bright stars.*

—GILEAN DOUGLAS.

AIR-RAID REHEARSALS

*Unhappy time, why have you built your house
So high that it cannot stand? I see that it has to fall;
When I look closer I can see nothing clearly, my eyes
are blinded with rain.*

*I see far fires and dim degradation
Under the war-planes and neither Christ nor Lenin will
save you.
I see the March rain walk on the mountain, sombre and
lovely on the green mountain.*

*I wish you could find the secure value,
The all-heal I found when a former time hurt me to the
heart,
The splendour of inhuman things: you would not be look-
ing at each others' throats with your knives.*

—ROBINSON JEFFERS.

In "Such Counsels You Gave to Me."

SPRING!

*Now suddenly the almond buds
Leap laughing into bloom—
The winds of spring come whistling through
The sky's great azure room.*

*And oh the birds upon the beams
A heaven-assailing throng!
Defy the sky to fall against
Whole citadels of song!*

—DORA HAGEMEYER.

A SEA SONG

*Ruffle on ruffle of broken breaker
Rides in from the wintry sea,
Bringing a song from the spheres' great acre
For only the gulls and me.*

*Ripple on ripple in swift succession,
Strings in on the mirroring strand,
Etching a line in its own impression,—
Recording a song in sand.*

*Comber and ruche to the run and rippet,—
Profundo, cantabile;
Measure on measure of toying triplet,
For only the gulls and me.*

—MARY MACEY DIETZLER.

Poetry published in this column is original unless otherwise stated.

PURSUIT OF HAPPINESS

Carmel doesn't care much what Pacific Grove thinks of this village. Neither does Pacific Grove care what Carmel thinks of its ever-pure community. Carmel was founded on the basis of a village of writers and artists chased out of San Francisco by an earthquake and a fire. Pacific Grove was founded as a religious conference and camp ground. Thus the two are as far apart by nature as the close confines of this peninsula will allow.

No small wonder, then, that Pacific Grove people are unwilling to have the "bundling" play, "Pursuit of Happiness", given in its high school auditorium, especially when some of the high school students might attend and come into contact with what the Pacific Grove officials deem dangerous material.

Ironical it is that Pacific Grove has a style of architecture chiefly along the Cape Cod lines. Ironical it is that the average resident of Pacific Grove is a New Englander or the descendant of a New Englander, for "bundling" is an old New England custom, as much a part of the old days of New England as the long faces of the New Englanders and the bleakness of their architecture. Ironical it is that many a Pacific Grove resident is descended from couples who "got to know each other right well" through the pleasant and, because of the cold winters and difficulty of heating under primitive conditions, expedient custom known as "bundling."

"Pursuit of Happiness", the play, reflects upon just this attitude toward the simple pleasures of life, as caricatured by the Rev. Lyman Banks, who pries into the private lives of his charges, sees there evil where none is intended, and by his very suppression of the natural activities brings about an effect just the opposite of what he had anticipated.

NO—NOT EIGHTH

Just who is interested in opening eighth street between San Antonio and Scenic is very vague. Of course the several merchants on Eighth in the business district many blocks above the beach would like to have more traffic routed their way, but beyond that there is no reason at this time why city money should be spent on the project.

The property owners on Eighth near San Antonio and Scenic don't want the street opened, and residents of Carmel don't particularly want it.

Although the police say that it would be a traffic convenience to have the block opened, they also say that would be offset by being a constant traffic hazard because of the steepness of the grade, ending in a blind corner at Scenic.

Much as we dislike the idea of opening just one block of Eighth, what would really cause us indignation would be any serious talk of opening Eighth through to Del Mar. Yes, even that is proposed. The city map designates these as streets, but they have never been built. To do so would mean the ruination of a lot of our beautiful beach.

MOVING ALONG

There were two meetings of the board of trustees of the Sunset school district held this week, one on Monday and the other Tuesday. Both meetings were significant but gave no real indication of the course of action to be taken in the future regarding the purchase of a site for the new high school.

On Monday the board met and rescinded the resolution of the former board under the domination of Frank Shea and Victor Graham to purchase the Paradise Park tract for the high school site. This was done so that all sites could be given an equal chance for a hearing, the other two sites being Hatton Ranch

and the Mission Ranch, which latter was proposed and strongly urged at the last general meeting of the board and the fact finding committee.

On Tuesday the Sunset School District board met in an adjourned meeting from Monday and listened to Corum Jackson, representative of the Carmel Realty Company, which in turn represents Willis Walker, owner of the Mission Ranch site, and also the Anglo California Bank which holds the mortgages on the property. Jackson's statement was brief and

to the point. The Mission Ranch property is not available. Jackson explained that they had sold the land for Walker and the bank in the Mission tract subdivision under certain restrictions and that they would not go back on their word.

With these facts added to what the fact-finding committee already knows, the committee signified its intention of reporting to the school board and the public in the very near future. What will happen after that will be up to the school board.

likeness. Your only work is to recognize your true self as that likeness. Your only business is to find God, your only activity is expressing God-like qualities, your only duty is to be Godlike. You are at one with God and can never be separated from Him, nor fall from this high estate.

PEOPLE TALKED ABOUT

Clyde Brion Davis, former newspaperman, author of "The Great American Novel", "The Anointed" and "Northend Wildcats", who is spending the winter in Carmel with his family, left on Wednesday for San Francisco. Davis took the bus as far as the San Francisco airport, which was somewhat of an adventure. Davis has crossed the continent innumerable times but never had a ride on a bus. Arrived by bus at the airport he will leave for Denver, Colo., by plane, and after a short stay there proceed by train to Kansas City and then Arkansas, where he will gather material for a book to follow his next book now in the hands of his publishers.

Tentatively called "Steam Wagon Road", Davis' next book is to be about the building of the railroad and early railroad days in the West. Later a book by Davis on the Arkansas river will join the "River Series". "Like father, like son", or "a chip off the old block"—Davis' son, David, was a winner in the American Legion Auxiliary's Americanism essay contest. His essay will be found in this issue of The Pine Cone.

For the first time since 1926 the paintings of Henrietta Shore, Carmel artist, whose forte is purity of line and color, are to be seen in New York City. An invitational exhibit is now open at the Georgette Passedoit Gallery and will remain open until the end of the month.

Besides the paintings by Miss Shore, there are also pencil drawings, colored crayon drawings and lithographs to be seen privately at the Passedoit gallery.

The prospectus of the Passedoit gallery has the following to say of Miss Shore:

"Henrietta Shore is an American artist of Canadian origin, who lives in California at Carmel-by-the-Sea. She started her career as a realist

of great talent and received encomium. But she had to yield to an exacting esthetic conscience and purified her means into this precise perfection which she has made her own. She has also completed successful mural works. Merle Armitage published a monograph of her work in 1933. Her only other showing in New York was in 1926".

The exhibit includes: Women of Oaxaca, Floripondios, Cypresses, California Data, Amaryllis, Iris, White Horse and Goat, My Cat, Cacti, White Gloxinia, Conchita, Mexi-

W. STUART BOOTH NAMED MOTHER CHURCH DIRECTOR

The election of W. Stuart Booth, C. S. B., a trustee of the Christian Science Publishing Society, to be a director of the Mother Church, the First Church of Christ, Scientist, in Boston, has just been announced by the Christian Science board of directors. Booth succeeds the late William R. Rathvon and will be nominated for the other positions heretofore occupied by Rathvon. Booth has resigned as a trustee of the publishing society.

HULSEWES ARE HOSTS TO VESTRYMEN AND WIVES

This Wednesday, the Rev. and Mrs. C. J. Hulsewé were hosts at dinner at the rectory to the vestrymen of All Saints' Church and their wives. Among those present were Mr. and Mrs. James L. Cockburn, Mr. and Mrs. A. W. Wheldon, Mr. and Mrs. W. W. Wheeler, Mr. and Mrs. Webster F. Street, Mr. and Mrs. E. H. Ewig, Paul Prince and Roy J. Gale. After dinner the men adjourned for the regular quarterly Vestry meeting.

Christian Science Lecture

(Continued from page 9)
eled singly, individually. There is no one who can do the traveling for any one of us; we must do it ourselves. Even Jesus could not do our work for us, but only show us how. Others may point the way, give us the benefit of their experiences, and assure us they have proved definitely that it is the right way, but we travel singly. Salvation is individual. It is for each one to recognize his oneness with God.

When Moses trembled on the brink of a tremendous undertaking he gained strength and courage from the assurance that the presence of God was always with him. So, on this straight and narrow way, we are not actually alone. We may walk with God all along the way; we can be just as sure as the patriarchs of old that His angels are given charge over us to keep us from falling or stumbling,

can Bathers, Primrose, Regal Lily, Seagull, Cactus (oil painting on glass), Regal Lilies, Succulents (pastel), and Persian Lily (opaque water color).

and plant our feet firmly on the right path. These angels Mrs. Eddy defines in Science and Health (p. 581) as "God's thoughts passing to man." Step by step we learn to trust God, and we find He gives us strength for each day, and is ever at our side.

In this brief hour I have only touched upon the truths contained in the Bible and "Science and Health with Key to the Scriptures." But you have these two textbooks of Christian Science for study, and all that you need to know about God, man, reality, the kingdom of heaven, is contained therein. Do not be discouraged if you do not understand it at first. Take anything that you do understand, however small it may seem to be, and apply it, prove it, make it your own, and the next step will be clearer to you.

In the back of Science and Health you will find a chapter called "Fruitage", which gives you authenticated cases of healing brought about solely through reading the textbook.

And as you travel upon this straight and narrow way to heaven, harmony, remember these few things. There is one God, one universe, and one man, made in God's image and

Carmel 1473 or 2

Daniel Willard of Carmel was 90 on Monday of this week and that afternoon Mrs. Willard and her daughter, Helen, invited several of Mr. Willard's friends to their home on Camino Real to congratulate him and drink egg-nogg. Those who called on this pleasant occasion were Mrs. Calvert Meade, Dr. and Mrs. Karl G. Rendtorff and their daughter, Miss Gertrude Rendtorff, Mr. and Mrs. Joseph Hartley, Mr. and Mrs. H. S. Nye, Dr. and Mrs. Francis E. Lloyd, Mrs. Elstner Hilton and her mother, Mrs. Tack, of Deerfield, Mass. Mr. Willard has taken an active part in the life of Carmel during his residence here which covers a great many years, and his many friends in the village will rejoice with him in attaining so splendid a birthday.

Mr. and Mrs. Douglas Winslow left Carmel on Monday. They motored as far as San Francisco with Mr. and Mrs. A. W. Wheldon of Carmel. From the city the Winslows will travel by train to New York. Mrs. Winslow will stay there for several weeks visiting her sister, while Mr. Winslow will continue to England and visit his relatives there.

Mrs. F. W. Clappett and her sister, Mrs. Edmund Dexter, have been in San Francisco visiting the Golden Gate International Exposition and also friends in Burlingame. Mrs. Clappett returned early in the week and Mrs. Dexter arrived back in Carmel on Wednesday.

An unusual and enthusiastic first nighter at Moor Born was Carmel's poet, Robinson Jeffers, Mr. and Mrs. Jeffers were seen in absorbed conversation with Colonel Charles Erskine Scott Wood and his wife, Sara Bard Field, who had motored down from Los Gatos in order to see the play. With them came two artists, Mr. Dennison and Mr. Ingerson. Colonel Wood, in a dashing Glengarry bonnet, was seen rushing back to San Francisco next day in order to be present at the West Point dinner. The colonel, who is 87, is the oldest West Point graduate on the Pacific coast.

Andrew Sessink, who sang the leading tenor arias in last year's Bach Festival, returning to the peninsula to sing in the Good Friday Oratorio, Stainer's "Crucifixion", to be sung in the Methodist Church in Pacific Grove on April 7.

Mr. and Mrs. Adam Darling left on Monday for San Francisco where they will visit the Golden Gate International Exposition. Following their stay in San Francisco they will leave for Denver and Kansas City. They expect to spend some time in the latter city visiting Mrs. Darling's brother, Charles Lyons, and will be back in Carmel after a month's absence.

Professor and Mrs. H. M. Wight are spending six months in Carmel. Professor Wight teaches at the University of Michigan at Ann Arbor, where he is professor of forestry and wild life conservation. Although the Wights have owned a house here for many years, they have only been in Carmel for brief visits and are now looking forward to spending half of their sabbatical year in the village.

Married in St. Patrick's Church in San Jose last Monday afternoon, March 13, the Reverend George Francis officiating, were Miss Mary Miles, daughter of Mr. and Mrs. Hugh Miles of San Francisco, and Bernard Watson, son of Mr. and Mrs. Charles A. Watson of Carmel. The bride was attended by her sister, Mrs. Norman Geary of Monterey and Richard Watson of Carmel was his brother's best man. Following the wedding there was a reception held at the home of Mrs. Alice Meckenstock of San Jose and formerly a Carmel resident. Present at the ceremony from Carmel were Mr. and Mrs. Charles A. Watson, parents of the bridegroom, Mr. and Mrs. Wallace Doolittle, his sister and brother-in-law and Mr. and Mrs. Richard Watson, his brother and sister-in-law. Bernard Watson was graduated from both the Sunset and Monterey Union High Schools. The couple will reside at 653 Second street in San Jose.

La Collecta Club held its regular bi-monthly meeting last Wednesday afternoon at the home of Mrs. D. E. Bain on Casanova street. Mrs. D. E. Nixon ably and interestingly reviewed for the members Anita Willets Burnham's "Around the World on a Penny." Mrs. Bain, the hostess, used St. Patrick's Day colors for both decorations and refreshments. This same scheme was further carried out by the reading of "The Prayer of Saint Patrick" by Mrs. Clara Louise Beller. Mrs. Bain's birthday was celebrated by the gathering. The next meeting of the club will be held on the afternoon of April 5 at the home of Mrs. Cecil Haskell on Monte Verde street when Mrs. John Albee will have charge of the program.

Mrs. W. F. Ten Winkel entertained 15 of her friends for dinner, followed by cards last Thursday evening. The party was held at Forest Lodge where the rooms were attractively decorated with flowers for the occasion. Those invited were Mr. and Mrs. Alfred Wheldon, Mr. and Mrs. Grant Wills, Mr. and Mrs. Adam Darling, Mr. and Mrs. Alfred Wolff, Mr. and Mrs. John E. Abernethy, Mr. and Mrs. Douglas Winslow, Mrs. Louise Hill, Mrs. Margaret Heebner and Mrs. J. J. Cushing.

James Hopper was back in Carmel again last week-end after having been away since before Christmas. Hopper has been in Washington, D. C., in connection with his work as California head of the WPA writer's project. Mrs. Hopper is still in the east continuing her studies at the Curtis School of Music in Philadelphia.

James L. Cockburn, Ranny Cockburn and Frank Lloyd left Carmel last Thursday and drove to Witter Springs in Lake county, where they spent two nights with Errol von Tempsky on the Flying-O ranch. They next proceeded to Eureka, where they spent Saturday night as the guest of Rex McBride, who returned to Carmel with them on Sunday.

Babette DeMoe, Carmel's young aviatrix, is at present having a good time as an amateur cowgirl in Palm Springs. She is the guest of Mrs. H. B. Boyce and her daughter, Jane Ellen, at their Smoke Tree ranch. Babette will return to Carmel on a United Airlines plane at the end of her two weeks' vacation.

Miss Sally Fry is about to leave Carmel for Mexico. While in Mexico, she intends to absorb all the atmosphere of the country and a great deal of Spanish. In order to do this she will spend the next three months of her visit in a Mexican home and talk nothing but Spanish every day.

Miss Jean Crowe arrived in Carmel on Wednesday and while here will be the guest of Dr. and Mrs. Francis E. Lloyd. Miss Crowe makes her home at Rosario on Orcas Island, one of the San Juan Islands on Puget Sound. She lived in Carmel some years ago and was active in village life here.

Mr. and Mrs. Fred Burgh of Hollywood are staying in Carmel and expect to be here for the next two months. Burgh is connected with the film industry in Hollywood and wrote a column for the "Hollywood Reporter", before coming here for a vacation.

Mrs. Grant Wills entertained at luncheon at Normandie Inn, followed by bridge at her home on Dolores street on Monday afternoon, in honor of Mrs. J. J. Cushing. The other guests were Mrs. Louise Hill of Douglas Schools, and Mrs. F. W. Ten Winkel.

Miss Carrie Covington, who is living in Carmel with her niece, Miss Dorothy Stephenson, spent several days in San Francisco last week and while there visited the Fair.

Miss Mollie Darling, one of the directors of the Carmel Players and often seen on the stage in their productions has left with her mother, Mrs. James G. Darling, for New York. Today they will sail on the Queen Mary for a visit of several months to England and Scotland.

Miss Janet Wild of Fresno, who is a student at the University of California at Berkeley, entertained recently at a house party at the summer home of her parents, Mr. and Mrs. Mount K. Wild in Carmel. Her guests were fellow members of her sorority, Pi Beta Phi. Those who came to Carmel from Berkeley were Miss Janet Curran, Miss Eleanor Mahan, Miss Beth Fennimore and Miss Julia Langevin, all of San Francisco; Miss Florence Gaines of Pasadena; Miss Nancy Lou Glass of Martinez; Miss Betty Jordan and Miss Nancy Ziegenfuss of Piedmont, and Miss Mary Elizabeth Allen of Oakland. Mr. and Mrs. Wild also motored to Carmel from Fresno to chaperone the event.

Miss Helen Heavey has had as her guest for the past week Mrs. E. F. Champney of Greenfield, Mass.

Carmel 1473 or 2

Mrs. James Greenan of Carmel entertained at a cocktail party on Tuesday afternoon at the Mission Ranch Club in honor of her husband, James Greenan. Mr. Greenan's extensive mining interests in Nevada keep him away from Carmel a great deal and this was an opportunity to greet a great many of his Carmel friends. A bright log fire burned in the lounge of the club which was lighted by wax tapers and decorated as was the adjoining sun room with quantities of spring flowers. A buffet table in the sun room was centered with a handsome arrangement of the same flowers. Those who called between the hours of 5 and 7 were: Mr. and Mrs. Whitney Alderman, Dr. and Mrs. T. J. Brennan, Mr. and Mrs. Marcy M. Brennan, Mrs. Wm. Kiscadden of Hollywood, Mr. and Mrs. H. W. Evans of Atherton, Mr. and Mrs. Milt Latham, Mrs. Paul Swanson, Mr. and Mrs. Fred Godwin, Mr. and Mrs. Donald Clark, Mr. and Mrs. Eric Van Zandt, Mrs. Connie Bell, Mr. and Mrs. Elmer Cox, Mrs. Connie Kitchin, Mrs. Lynda Rookeley, Mrs. and Mrs. W.

of Reno, Miss Beverly Tait, Miss Mary Hastings, Mr. and Mrs. Al Sparks, Mr. and Mrs. Corum Jackson, Mr. and Mrs. Peter Burk, Mrs. Roma Ware of Reno, Mr. and Mrs. Byington Ford, Mr. and Mrs. Paul Whitman, Miss Marguerite Moll, Mr. and Mrs. Herman Crossman, Dr. and Mrs. Ray Brownell, Mr. and Mrs. Carl Burrows, Mrs. Mast Wolfson, Mrs. Rita Beller, David Arnold, Mr. and Mrs. Howard Monroe, Mrs. Wyatt Shalleross, Miss Susan Shalleross, Mrs. Ivy Van Cott, Mrs. Betty Carr, Mrs. Marian Karr, Mr. and Mrs. Jon Konigshofer, Mrs. Esther Bergen, Mr. and Mrs. Richard Masten, Mr. and Mrs. Colden Whitman, Mrs. Marie Elizalde, Mrs. Caroline Pickett, Miss Mary Jepp, Mr. and Mrs. Paul Dougherty, Mrs. Frances Hudgins, Countess Nostitz, Mr. and Mrs. Robinson Jeffers, Miss Flavia Flavin, Mr. and Mrs. David Alberto, Mr. and Mrs. Gustav Lannestock, Willard Whitney, Bob Smith, Dave Davis, Sam Colburn, Bill Nye, Kim Moore, Geo. Aucourt, Leo Kohler, Mort Henderson, Phil Nesbitt, Louis Conlan, Geo. Gordon Moore and Garth Jeffers.

Mrs. Helen Wood's second grade class at Sunset school enjoyed a very fine birthday party on Tuesday afternoon. It was to celebrate the birthdays of both Dickie Weer and

120 Main St. Monterey

Eric Otto, who were born on the same day. There were games followed by ice cream, cookies and candy. Assisting Mrs. Wood in entertaining the children were the two boys' mothers, Mrs. Lloyd Weer and Mrs. Clay Otto.

Mr. and Mrs. James L. Cockburn received a postcard this week from Mr. and Mrs. Kent Clark, who were at that time in Laurence Marques, Mozambique, Africa. The card shows an unusually fine view of Table Mountain with Cape Town spreading at its feet and the sun setting in a magnificent cloud effect. The Clarks remarked that these same cloud effects are the finest they have ever seen anywhere, and are general in South Africa. They are having a "wonderful trip" and are well.

Frank Townsend, tanned a deep brown by the Sierra sun, is back in Carmel this week. With Mrs. Townsend and their two daughters, Charlotte and Honey, he has been spending the winter skiing in Yosemite.

Visiting her brother and sister-in-law, Mr. and Mrs. Frank Adams Huffer in Carmel is Mrs. John E. Laverder of Dyer, Nev.

Mr. and Mrs. William Magee, Jr., of San Francisco are the guests of Mrs. James Greenan in Carmel this week. While here the Magees are staying at the Mission Ranch Club.

Mr. and Mrs. C. C. Shephard, Jr., entertained on Tuesday evening at dinner in honor of Mr. and Mrs. Totten Heffelfinger of Minneapolis, who are visiting L. Heffelfinger.

Miss Betty Jukes and Mr. and Mrs. Christopher Buckley spent last weekend in San Francisco, seeing the polo played at the Golden Gate championships.

Winners at the weekly bridge tournament at the Mission Ranch Club Monday evening were Mrs. Marion Karr and David Eldridge. Second were John Thompson and Don Hodgson. The Sunday buffet supper and bridge were enjoyed by 28 members.

Mr. and Mrs. Philip Wilson are down from their home in Burlingame and Mrs. Wilson is planning to stay for some time. She was in hospital for a few days with a cold. With his son, James Wilson, Mr. Wilson is active in a nursery business in Millbrae.

Mrs. William Kiskadden of Los Angeles who has been spending the last month at the Mission Ranch club, leaves for her home in the south today.

Mr. and Mrs. Donald H. Clark are now receiving their friends in their home, "Tuckaway", on Casanova street near Twelfth. Mrs. Clark is the former Grace Matthews Case.

Mrs. L. E. Pierce of Salinas began her classes in bridge at the Mission Ranch Club on Wednesday as a weekly feature at the club.

Doris Weston, who will be remembered as a lead opposite Dick Powell in "Singing Marine", and who played a small part in "Peg of Old Drury", seen at the Filmarte recently, will be the guest of Mrs. Marjory Bare and her son, Dick Bare, for this week. She is resting from work in a lead role for Columbia's "Mandrake the Magician."

Mr. and Mrs. Thomas Mulvin, San Carlos and Thirteenth, had as their guests this week Mrs. Mulvin's sister and brother-in-law, Mr. and Mrs. Peter Brewington, who came up from southern California.

Visiting Mrs. Margaret Lang in Carmel last week was Mrs. W. R. Hornbuckle of Kansas City. Mrs. Hornbuckle left on Thursday to return to her home, having found Carmel one of the most fascinating and beautiful places she had ever seen.

Quarantine on Dogs and Cats Imposed

who will be at the Monterey city hall each day from 9 to 10 a. m. and 4 to 5 p. m., except on Saturday, when he will be there from 9 to 10 a. m. Owners must sign a release and on second offense will be guilty of a misdemeanor.

Indications yesterday were that the quarantine will be in effect for at least two and possibly three months, or until rabies has been stamped out in this area.

Dogs may not be taken out on a leash or carried in cars, it was stated.

Besides dogs and cats, other domestic animals and squirrels are susceptible to rabies.

Cancan Revival for Del Monte, April 1

Cancan dancing, which has been having a revival all over the United States, will be only one of the entertainment features at the "Folies de Paris" in Del Monte's Ball Room on Saturday night, April 1.

The theme of the party will be a mythical cruise to Paris and the Ball Room is being redecorated by Phil Nesbitt, Carmel artist, to resemble the flagship of the French line.

ELEANOR ABERCROMBIE, HERE 15 YEARS, PASSES

Miss Eleanor Abercrombie, who had lived here with her friend, Miss Helen Rosencrans, for the past 15 years, died in Carmel on Tuesday morning following a brief illness at her home, "Sunaround", on Carmel Point.

Rear Admiral Samuel Shelburn Robinson, U. S. N. retired, is the guest of his son and daughter-in-law, Captain and Mrs. Shelburn Robison, in their Carmel Woods home. Admiral Robison is the superintendent of the Admiral Farragut Naval Academy in New Jersey. Prior to this he was the superintendent of the United States Naval Academy at Annapolis. He has come to the west coast in order to make a trip from Bremerton to San Pedro on the U. S. S. Arizona with Admiral Nimitz. Tuesday afternoon Captain and Mrs. Robison invited a group of the admiral's old service friends to their home for tea and cocktails. Mrs. B. F. Wright of Monterey assisted her daughter, Mrs. Robison, in receiving the guests.

Miss Edith Lange, Santa Lucia street, left Wednesday for Palm Springs where she will be the guest of Captain and Mrs. Charles Hill, her sister and brother-in-law, who are at present staying in the desert resort. She was accompanied on the trip south by Mrs. R. Russ of Woodstock, Calif.

Mr. and Mrs. Eugene Marble of Carmel Valley became the grandparents of Christopher Stuart Marble, born Sunday at Community Hospital. He is the son of Mr. and Mrs. Stuart Marble.

Mrs. W. G. Griffith of Santa Barbara was the guest last week of her daughter, Mrs. Don Hodgson, at her home on North Dolores street.

Mr. and Mrs. Lloyd Tevis have been spending some time this week in San Francisco at the Cliff hotel.

The first dog show held in Chico under the management of the Golden Empire Kennel Club will be held on April 29 and 30. One of the judges will be Mrs. Margaret Kehr of Carmel.

Gene Nohl, Pioneer in "Crazy" Field of Deepsea Diving, Leads Charmed and Charming Existence

By FRANCIS L. LLOYD

To see a willowy young man of 28, with sparkling blue eyes, thin nose and lips, dark sleek hair, in a tuxedo, giving a lecture before a packed audience at the Carmel Forum, you would not think that this same slender young fellow holds the world's record for a deep sea dive in a diving dress of his own invention, and divides his time between exploring the depths and performing outstanding research into the baffling problems of making it possible for man to descend to marine depths where only the strangest forms of fish life can exist.

Yet, Max Gene Nohl is that young man, self-assured, yet possessed of a dynamic energy which expresses itself in quick, nervous gestures, a graduate of Massachusetts Institute of Technology, who hitched his cart to a star and landed at the bottom of the ocean.

For, Gene Nohl declares, he looked at the brown globe in a Milwaukee schoolroom as long ago as his few years allow, and dreamed of explorations he was to find had already been made. Most of the world, he soon discovered, had been reached by man. Footsteps in the sands of time had been made by man in almost every part of the dry land in northern and southern hemispheres. He also learned that three-fourths of the world was under water. Into this submerged land few men had gone and then only in the shallowest fringes. Here, then, was a challenge to Nohl's imagination and he directly set upon a course which took him by the shortest route to the top of the undersea diving world — which is, at this writing, exactly 420 feet down beneath the waves of Lake Michigan, where, on a cold December day, he descended from the Coast Guard Cutter Antietam to make a dive which surpassed a record of 303 feet which had stood since 1915.

He's "Human Guinea Pig"

Young Nohl pursued his muse through college, where he took a mechanical engineering course, had the good sense to stray into physiology in order to prepare himself for the research on the human guinea pig (himself) which enabled man to reach depths through use of helium to which man could never before have gone and come back alive.

Nohl remarked upon the fact that helium, second lightest element, next to hydrogen, which with oxygen forms an explosive mixture, is now used to float lighter-than-air ships and to take man down on his lowest descents.

Along the road to high adventure, in the deeps, Nohl began his first diving and, incidentally, salvage operations, on a tiny sloop called the Silver Heels in Vineyard Sound on

the Atlantic Coast. He worked on a sunken rum runner, the John Dwight, scuttled by her crew after the captain had twice sold her \$350,000 whisky cargo for amounts totaling \$250,000 in down payments. The chase grew too hot, and the crew feared the vengeance of the gangsters, and so blew a hole in the side of the vessel. She sank with her whisky and cash, and years later Nohl went to work on her. Some of the whisky, in bottles, was salvaged — at least the bottles were, for the salt water, under pressure, had mixed with the original contents. The whole operation after months of weary effort failed because of this freak of nature. Even the money, which reputedly went down with the ship, was never found. A gruesome phase of the anecdote as told by Nohl was the finding of the bodies of the crew by fishermen, the faces burned away with acid, the skulls bashed in, in retribution for the perfidy of their captain.

Diver "Deflated"

It is perhaps this gruesome aspect of the sea, especially where men go down in thin diving dress under pressure capable of collapsing a man like a punctured balloon, that grips audiences. Nohl knows this and gave his lecture a vicarious thrill when he told of a diver who had his airline cut by a harmless and well-meaning giant manta ray. The fish only wanted to scratch the parasites on his rough hide against the diver's airline. However, it easily chafed through the rubber hose, released the pressure which kept the seawater from crushing the diver into his helmet, and the six-foot man was telescoped like an accordion until he was a mass of pulp less than three feet in length.

Illustrating his lecture with motion pictures, some of them in vivid color, Nohl at this point gave some of his younger listeners a moment of great expectation. Out of respect for his audience, however, and because, as he admitted afterwards, the photographs had not been particularly clear, he refrained from showing the actual collapse of the diver under pressure — pictures, in fact, taken by the doomed diver, who set his camera only an instant before the "sea bat" came like a cloud overhead and shut out the light.

Most Divers Mystics

Divers, like most men who follow risky trades, are likely to be mystics. Nohl, probably because of his thorough education in his field and his devotion to the scientific aspects of deepsea diving, is less so than, for instance, John Craig, author of "Danger Is My Business", the story of undersea work, partly about Nohl's diving expeditions, discoveries and inventions. Nohl disclaims the attitude that "because helium is a light gas, fluffy like clouds, it has a mysterious quality of being able the better to hold out the sea", and that "a single tear in the diver's suit will let in the water and send the diver to a fearful death."

Devil Fish Are Timid

"I've had the whole leg torn off my suit," he declares. Nohl is emphatic, also, in regard to the stories of octopi attacking divers. He finds the devil fish shy creatures, difficult to get near enough to for the camera to photograph, and admits he has never even heard of one attacking man, Victor Hugo's "Toilers of the Deep" to the contrary as well as some alcohol-tainted rumors along Monterey's waterfront.

Nohl is scientific. In the search for some hoped-for, mysterious chemical substance which would make divers

'Shining Hour' at Carmel Theater

Joan Crawford comes back to dancing in a motion picture for the first time in five years in "The Shining Hour", which plays at the Carmel Theater Sunday, Monday and Tuesday. Fred Astaire was her partner in "Dancing Lady", which introduced both Nelson Eddy and Astaire to screen audiences.

Now Tony DeMarco is Crawford's partner in a dance which he himself created for "The Shining Hour." In this picture Crawford appears with an array of stars including Margaret Sullavan, Robert Young, Melvyn Douglas and Fay Bainter.

The actress goes through a difficult routine of six dances incorporated into one. The scene runs eight minutes on the screen, and includes variations of the tango, rumba, fox trot, tap, eccentric and ballroom dances.

This is a first run for the peninsula.

"Night in Venice" Being Planned

"A Night in Venice" will be the second program to be given by the San Carlos Music Society, which recently gave a highly successful "Night in Italy" at Crespi Hall.

Rehearsals are under way and following next Sunday's rehearsal all members of the San Carlos Music Society, recently organized under the chairmanship of Mrs. Angela De-Mario Reilly, will be entertained at a Bohemian dinner to be given by Anna Royka at her home on Caasnova street.

safe from the curse of diving, the bends, caused by nitrogen dissolved in the blood under pressure and released "like champagne bubbles" when the diver comes to the surface too quickly, Nohl went to work on guinea pigs. They were placed in stout steel tanks, subjected to pressure, and studied. Various gases were introduced instead of the dangerous nitrogen, which makes up the bulk of common "air", and, in this manner, helium was found to be ideal. In the "diving lung", invented, patented and manufactured at his own factory at Milwaukee, Nohl applies this discovery, mixes 21 per cent of oxygen with 79 per cent helium, and gets perfect results.

Guinea Pigs to Rescue

Guinea pigs, taken out of the pressure tanks too quickly develop the bends, or caisson disease, but put back in the tanks, given a helium

mixture, can be taken out again quickly none the worse for their experience. It is pitiful to see the guinea pigs suffering from the bends. One could feel the audience shuddering at the sight. It is also pitiful to see a man dying from the bends, as one Navy diver did last year at Mare Island, where he had been flown from Morro Bay in an attempt to save his life. But to show his audience that the work of the guinea pig is not in vain, and that medical research keeps faith with its guinea pigs, Nohl showed on the motion picture screen a doctor, another diver and himself going into similar tanks, testing the helium mixture, subjecting themselves to possible harm as "human guinea pigs."

The pictures clearly show the condition of a diver as he is under the pressure of tons of ocean water, perspiration dripping from every pore, but able, in the tank, to wipe it out of his eyes and from the tip of his nose, a thing no diver can do while in a suit. Pleasanter, for amateurs, is the swimming lung, which permits a swimmer to remain under water for a considerable time while freely swimming.

Divers "Blown Up"

Besides the bends, which can be prevented by helium equipment, as used in the deep diving Craig-Nohl dress, other hazards threaten the diver, according to Nohl, who listed the "squeeze", in which pressure "deflates" the diver, pushing his body into his helmet, and "blowing up", which occurs when the air valve sticks and the suit is expanded by the built up air pressure like a balloon, carrying the diver at great speed to the surface—an occurrence usually producing the dreaded bends. In the helium diving dress there is no hose connection to the surface, the control of the helium-oxygen mix-

ture from tanks worn on the back, being entirely up to the diver. Only the line by which the diver is lifted and lowered and the telephone line connect him with the diving boat.

Lying ahead of Nohl are other experiments and discoveries, adventures beneath the sea, salvage operations, perhaps on the ill-fated Lusitania, exploration of sunken cities, in a land which is peculiarly his.

Believe it or not—Gene Nohl is the Lindbergh of the ocean, and like Lindbergh, combines his skill and experience with a keen knowledge of science, and a love of his medium, the sea. America could have had in these times no two more valuable young men. Lindbergh got into the biggest headlines and won the greatest popular acclaim because the public is air-minded. Nohl has won his fame among those who know as much about the sea.

He's a daring young man, with a more thrilling bit of mechanism than a flying trapeze.

(Continued from page 4)

est to be paid on said indebtedness is not to exceed 3 1/2% per annum, payable semi-annually.

SECTION 3. The City Council of the City of Carmel-by-the-Sea hereby finds and determines that said City has incurred no indebtedness for public improvements, save and except as follows:

(a) Municipal Improvement Bonds, issue of the year 1930, in the total sum of \$15,000.00, interest at the rate of 5% per annum, payable semi-annually, balance unpaid but not yet due \$9000.00.

(b) Municipal Improvement Bonds, issue of the year 1936, in the total sum of \$12,000.00, interest at the rate of 5% per annum, payable semi-annually, balance unpaid but not yet due \$9000.00.

And said Council further determines that said present bonded indebtedness of said City for municipal improvements in the aggregate sum of \$15,000.00, together with the total of said proposed indebtedness for said public improvements amounting to said sum of \$15,000.00, as aforesaid, does not and will not exceed in the aggregate fifteen (15) per cent of the assessed valuation of all the real and personal property in said city, which said assessed valuation amounts to the sum of \$3,611,510.00 or thereabouts.

SECTION 4. Said special municipal election hereby called and ordered to be held and conducted; notice thereof given, the votes thereat received and canvassed, the returns thereof made, and the result thereof ascertained, determined and declared in pursuance of the provisions of that certain Act of the Legislature of the State of California entitled "An act authorizing the incurring of indebtedness by cities, towns and municipal corporations for municipal improvements and regulating the acquisition, construction, or completion thereof", which became a law without the Governor's approval February 25, 1901, and the amendments to said Act; provided further, that pursuant to the provisions of the certain Act last above mentioned such provisions setting forth the procedure for the calling and holding of elections thereunder shall be complied with except that the election precincts, polling places and officers of election in said special municipal election hereby called shall be as follows:

lows:

That there will be one voting precinct for the purpose of holding said election, consisting of a consolidation of the regular election precincts duly established for holding state or county elections in said city as follows:

Consolidated Voting Precinct "I", comprising all of state and county precincts designated "Carmel No. 1 precinct", "Carmel No. 2 precinct", "Carmel No. 3 precinct", "Carmel No. 4 precinct", and "Carmel No. 5 precinct."

That the polling place for said Consolidated Voting Precinct "I" shall be in Carmel Fire House, South Side of Sixth Avenue, between Mission and San Carlos Streets;

That said Consolidated Voting Precinct "I" shall comprise all of the territory within the said City of Carmel-by-the-Sea;

That for the purpose of holding said special municipal election, election officers for the said Consolidated Voting Precinct, shall, pursuant to law, consist of one inspector, one judge and two clerks, who shall have charge of such election in and for such Consolidated Voting Precinct, and the following named persons are hereby designated and appointed the election officers to conduct such election in the capacities hereinafter set forth, each of the said persons being a resident and a registered, qualified elector of the said Consolidated Voting Precinct and appearing upon the register of applicants for such positions on file with the County Clerk of the County of Monterey, State of California, wherein said City is situate, to-wit:

Inspector (1) William L. Overstreet;
Judge (1) Jean C. Whitcomb;
Clerks (2) Clara B. Leidig and Elizabeth H. Sullivan.

That the compensation for each of said election officers is hereby affixed as \$5.00 for acting in such capacity for said election.

That the polls for said election shall be and remain open from the hour of 9 o'clock A. M. of said day until the hour of 7 o'clock P. M. of the same day continuously (except as provided by Section 1164 of the Political Code of the State of California) when said polls shall be closed.

SECTION 5. The official ballots to be used at said special municipal election shall conform to the laws of the State of California relative thereto and among other matters required to be printed thereupon shall appear the following proposition, to-wit:

"Shall the City of Carmel-by-the-Sea incur a bonded indebtedness for the construction and completion of the following municipal improvement, to-wit: The construction and completion of an addition to the Ralph Chandler Harrison Memorial Library, the construction of a sidewalk and retaining wall in and about the same, and the equipping and furnishing of the said addition, at a cost to said City, exclusive of the funds made available by the Board of Trustees of the Ralph Chandler Harrison Memorial Library, of \$4500.00?"

SECTION 6. That the City Clerk shall procure the necessary voting booths and see that they are properly erected; she shall also have the necessary ballots printed, and secure the necessary ballot boxes, stamps, ink pads, voting lists, rosters, instruction cards, affidavits of registration and indexes thereto, tally lists, returns, envelopes, and all the necessary supplies, and see that they are properly distributed to each voting booth, prior to the opening of the polls upon the day of said election.

SECTION 7. That The Carmel Pine Cone, a weekly newspaper of general circulation, printed, published and circulated in said city, and the official newspaper thereof, is hereby designated as the newspaper in which all notices relating to said election shall be published.

SECTION 8. That in all respects not otherwise provided for herein, said special municipal election shall be held and conducted in accordance with the general laws of the State of California, governing elections in cities of the sixth class.

ance with the general laws of the State of California, governing elections in cities of the sixth class.

SECTION 9. Any qualified voter of said city may vote in favor of or against the proposition hereby submitted by stamping a cross (x) in the block or space or vote square to the right of and opposite the answer he or she desires to give; and all ballots stamped with a cross in the square to the right of and opposite the word "yes" shall be counted in favor of declaring the bonded indebtedness stated in such proposition; and all ballots stamped with a cross (x) in the square to the right of and opposite the word "No" shall be counted as against the proposition so voted upon and against incurring the indebtedness stated in such proposition.

SECTION 10: The said City Clerk shall cause this ordinance, upon its final passage and approval, to be published once a week for two weeks in The Carmel Pine Cone, one insertion for two succeeding weeks shall be a sufficient publication therein, and no other notice of said election need be given.

SECTION 11. The Council of said City hereby determines that the public interest, convenience and necessity of said City demand the acquisition of said public improvements above described; that said improvements are necessary and convenient to carry out the objects, purposes and powers of said municipality, and that said Council will and does hereby submit said proposition to the qualified voters of said City at said special municipal election.

SECTION 12. The bonds authorized to be issued pursuant to said election shall be negotiable in form and of the character known as serial and shall bear a maximum rate of interest not to exceed three and one-half per cent (3 1/2%) per annum, payable semi-annually, principal and interest payable in lawful money of the United States of America in the manner hereinafter set forth.

SECTION 13. The total indebtedness authorized to be created at said election shall be represented by bonds payable as in this ordinance provided; that said bonds shall be issued in such denominations as said Council shall hereafter authorize except that no bonds shall be of a denomination less than one hundred dollars (\$100.00) nor of a denomination greater than one thousand dollars (\$1000.00). In the event that bonds to represent the indebtedness proposed in said proposition set forth above, shall be authorized at said election, the same shall be embraced in one bond issue and shall be known and designated "Municipal Improvement Bonds, Issue of 1939."

SECTION 14. The principal of said bonds shall mature and shall be due and payable and shall be paid in the years and the amounts as follows:

\$1000.00 in each of the years from 1940 to 1943, both years inclusive, and \$500.00 in the year 1944, and shall be paid at the office of the Treasurer of said City in said City of Carmel-by-the-Sea on the day and date to be hereafter fixed by said City Council, the legislative body of said City, together with interest on all sums unpaid at such date; provided that interest on all of said bonds shall be paid semi-annually so that there shall be a payment of interest on all sums then unpaid each and every half year, one of such semi-annual payments in each year being paid at the date of the payment of the annual installment of the principal of such indebtedness.

SECTION 15. On Monday, the 10th day of April, 1939, the returns of said election shall be canvassed by said Council at the Council Chamber thereof in the City Hall of said City at the hour of 7:45 o'clock P. M. of said day in the manner provided by law, and the result thereof declared; and if it shall appear from such returns as made and the results so declared that two-thirds (2/3) or more of the qualified voters voting at said election on said proposition voted in favor of such proposition then bonds of said City in the amount of and as set forth in such proposition so carried shall be issued and sold to the highest and best bidder for cash, but not, however, for less than the par value of such bonds and accrued interest thereon to date of delivery.

SECTION 16. In the event that

said Municipal Improvement Bonds shall be issued and sold, then said Council at the time of fixing the general tax levy and in the manner for such general tax levy provided shall levy and collect annually, until such bonds are paid (or until there shall be a sum in the treasury of said City set apart for that purpose, sufficient to meet all sums coming due for principal and interest on said bonds) a tax sufficient to pay the annual interest on said bonds, and also such part of the principal thereof as shall become due before the time for fixing the next general tax levy.

SECTION 17. This ordinance being an ordinance calling and providing for an election shall, pursuant to the laws of the State of California, take effect and be in force from and after its final passage and approval.

PASSED AND ADOPTED BY THE CITY COUNCIL OF THE CITY OF CARMEL-BY-THE-SEA this 22nd day of March, 1939, by the vote of more than two-thirds of all the members thereof, to-wit, by the following vote:

AYES: COUNCILMEN: Heron, Kellogg, Watrous, Bechdolt, Smith.
NOES: COUNCILMEN: None.
ABSENT: COUNCILMEN: None.
APPROVED: March 22nd, 1939.

HERBERT HERON,
Mayor of said City.

ATTEST:
SAIDEE VAN BROWER,
(SEAL) City Clerk thereof.

I, the undersigned Clerk of the City of Carmel-by-the-Sea and Ex-Officio Clerk of the Council of said City:

Do hereby certify: That the foregoing Ordinance is a true and correct copy of Ordinance No. 204 of said City which was introduced at an adjourned regular meeting of March 15th, 1939:

Passed and adopted at an adjourned regular meeting of said Council on the 22nd day of March, 1939, by the following vote:

AYES: COUNCILMEN: Heron, Kellogg, Watrous, Bechdolt, Smith.
NOES: COUNCILMEN: None.
ABSENT: COUNCILMEN: None.

I further certify: That said Ordinance was thereupon signed by Herbert Heron, Mayor of said City.

ATTEST:
SAIDEE VAN BROWER,
(SEAL) City Clerk thereof.

Filmarte Shows "Lady Vanishes"

People who have watched an Alfred Hitchcock production report that at first they are absorbed by the story and the action, that then they indulge in picking up sly clues, and finally they settle back to contemplate the master's technique, watching the director as much as the picture. This may be done when seeing "The Lady Vanishes" at the Filmarte theater tonight or tomorrow.

The Hitchcock touch is an elusive thing, defying explanation. The pleasure in watching this director as a weaver of mystery and adventure tales lies in trying to detect him in the act of slipping in a clue—in his casual, offhand fashion—or in planting the elements of suspense. Sometimes they catch him; sometimes they don't. It's fun either way.

A fair sample of the Hitchcock method of sneaking in an important clue is furnished in his newest thriller, "The Lady Vanishes", with Paul Lukas, Dame May Whitty, and Margaret Lockwood and Michael Redgrave featured. In an early sequence,

Joe Eturra Gets 45 Days for Assault

Found guilty on a charge of assault, Jose Eturra of Carmel was sentenced to 45 days in the county jail by Superior Judge H. G. Jorgensen.

Eturra was arrested after a Tortilla Flat affray in which Andre Gomez, popularly known as "Redwing", was badly gashed. The fight occurred at the home they share in Carmel on Jan. 17.

Eturra was placed on probation for two years.

FINAL OKEH GIVEN PURCHASE OF RADIO

Commissioner of Police Frederick R. Bechdolt can buy the "emergency two-way police radio" on the installment plan. A resolution permitting payments between \$850 and \$1300 per year within three years was passed Wednesday by the council. The radio is being obtained from Pierce and DeLane, Los Angeles, for \$2546.68.

a strolling street singer is caterwauling under a romantic balcony. From offscreen a menacing hand appears and clutches him by the throat. The song breaks off, the singer disappears. Was it the work of an outraged music lover, or...? There is something both comical and sinister about the scene. The reaction of the cognoscenti will be: "Warning. Hitchcock at Work." They will advise you, too, to memorize the song. It might be important.

Woman's Club to See Play April 17

The program for the next general meeting of Carmel Woman's club will be a play to be put on by Carmel Players, directed by Charles McCarthy, at the Players Green Room on Casanova street. The play is to be "The Monkey's Paw", by W. W. Jacobs. As there was an unavoidable delay in receiving the script, the board of directors of the Woman's club decided at its meeting Monday to set April 17 as the date of this meeting, instead of the customary first Monday of this month. There will be no club meeting on April 3.

This will be a closed meeting, for members of the Woman's club only, and membership cards must be shown at the door. There will be a brief business meeting before the play, as it is necessary at this time to hear the report of the nominating committee. The board appointed Miss Agnes Knight chairman of this committee. She will select those to serve with her from a list suggested by the board, and it will be their duty between now and April 17 to prepare a slate from which the board of directors will be elected at the May meeting.

"The Monkey's Paw" is a mystery thriller, offering opportunities for some very fine acting. It is described as "a story in three scenes"; is considerably shorter than a full three-act play, but longer than most one-act plays. It has a cast of five and McCarthy will announce his selections next week. Following the play tea will be served by the Woman's club hospitality committee headed by Mrs. S. M. Baldwin. Cast and director will be honor guests at the tea.

SHAKESPEARE SCENES UNDER REHEARSAL

Herbert Heron announces that rehearsals of scenes from Shakespeare's "Twelfth Night" and "King Henry IV" are being held on Friday evenings at 8 at the Green Room.
